SOUTHEASTERN LIQUID ANALYZERS

WHAT DO THEY MAKE IN YORK COUNTY?

Southeastern Liquid Analyzers (SELA) produces devices designed and patented to sample and visually analyze the contents of underground fuel storage tanks. They also produce disposable liquid sampling devices made of plastic for the chemical, pharmaceutical and hazardous waste industries.

HOW DID SOUTHEASTERN LIQUID ANALYZERS GET STARTED?

The company started out of a garage back in 1983. Though the company has made millions of straws to date, the first product was actually a device designed and patented to sample and visually analyze the contents of underground fuel storage tanks.

WHERE DO THEY OPERATE?

Their manufacturing and back office operations are located in York, SC.

WHAT KIND OF CAREERS ARE OFFERED?

SELA offers jobs in manufacturing and back office operations.
