SCHAEFFLER

WHAT DO THEY MAKE IN YORK COUNTY?

In addition to serving as the home of its regional headquarters for the Americas, Schaeffler's Fort Mill, S.C., campus operates two manufacturing plants that produce a variety of precision products for automotive and industrial applications. These include fuel-saving variable cam timing units used in automotive engines as well as axial needle roller bearings for automatic transmissions.

SCHAEFFLER

WHO IS SCHAEFFLER?

The Schaeffler Group is a global automotive and industrial supplier whose enduring success is built upon unsurpassed quality, outstanding technology and a singular innovative ability. With high-precision components and systems for engine, transmission and chassis applications as well as rolling and plain bearing solutions for a wide range of industrial applications, Schaeffler is actively shaping "Mobility for tomorrow."

WHERE DO THEY OPERATE?

Over 92,000 employees make Herzogenaurach, Germany-based Schaeffler one of the world's largest family companies, whose worldwide network of manufacturing locations, R&D facilities and sales offices encompasses approximately 170 locations in over 50 countries. Schaeffler employs more than 1,400 associates at its Fort Mill campus.

WHAT KIND OF CAREERS ARE OFFERED?

Schaeffler offers an award-winning apprenticeship program for high school graduates, a multifaceted Group Engineering program for college graduates, as well as rewarding career opportunities in manufacturing and engineering.
