

Mouth Care Without a Battle[®]
Policies on Sale, Use and Distribution

Thank you so much for your interest in improving oral health care for physically and cognitively impaired individuals.

Mouth Care Without a Battle[®] was developed as an educational tool and the developers want it to be maximally useful to (a) educational institutions such as community colleges, nursing schools, and dental schools, and (b) nursing homes, assisted living communities, and home health agencies (that provide in-service education). However, the version is under copyright and so is subject to copyright laws. Also, it contains video footage of patients in nursing homes, which we have permission to use for educational purposes but not other uses.

There is only one version of the program, and it can be purchased at the website www.mouthcarewithoutabattle.unc.edu. We have kept the cost modest so as to make it widely available. Organizations, such as approved vendors or long-term care organizations, can obtain a discount of 50% if they purchase 10 or more copies.

We offer continuing education credits at a very modest price (\$5 for up to 3 hours) to encourage formal use for credit.

We ask purchasers to respect and follow these policies for use of *Mouth Care Without a Battle*[®]:

1. It may not be duplicated.
2. It can be shown in on-site, in-person educational programs such as nursing home in-service presentations.
3. It can be placed on a secure website if access is password protected and limited to health care providers or students. This is often done by organizations such as community colleges (for students in a course) or individual nursing homes (so that all their staff can have access).
4. Multi-site organizations such as nursing home chains are asked to purchase one copy for each site that will use it, and may use our 50% discount rate if purchasing 10 or more copies.
