## PRESS RELEASE

The 2018 Franklin County Community Health Needs Assessment (CHNA) Report is now available. The full report and the executive summary can be downloaded from the Franklin County Health Department's [Health Education Page](#). The report will also be available at [HealthENC.org](http://HealthENC.org). Printed copies will be available at the health department upon request; limited printed copies will be available at local libraries. The CHNA is completed in efforts to foster a better understanding of the health needs of Franklin County residents. The year-long process is used to establish health priorities for the next three years and culminates in a community health improvement plan to address these priorities.

The top four health priorities will include:

- Access to Health Services
- Exercise, Nutrition & Weight
- Mental Health & Mental Disorders
- Substance Abuse

To learn more about our services, programs, and the Community Health Needs Assessment and resources, contact the health department at 919-496-2533 or visit our website: [franklincohealth.org](http://franklincohealth.org).
