**Press Statement**  
**Data Correction to Previous Statement**  
**in**  
**Town of Youngsville’s Holiday Parade on 12-5-2020**

**From:**

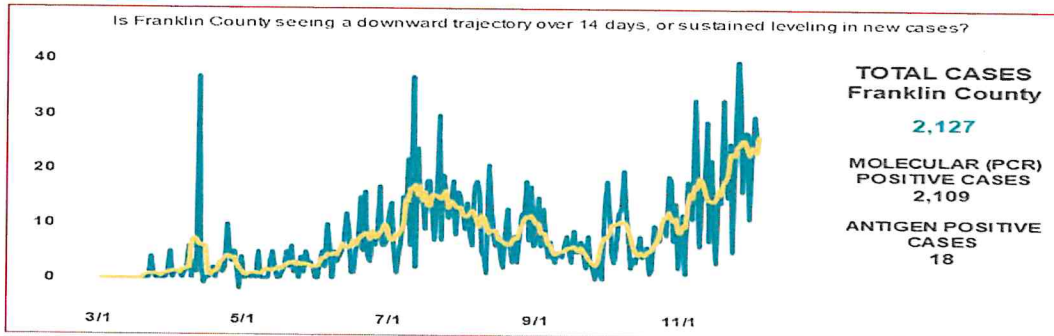

Scott S. LaVigne, MSW, MBA  
Franklin County Health Director  
Public Information Officer, Franklin County COVID-19 Emergency Operations Center (EOC)

**CORRECTION:**

The previous release indicated Franklin County had experienced 1,062 new COVID-19 cases in November 2020, which was INCORRECT. The statement should have read:

**New Cases:** In the past month, Franklin County has added 542 new cases. It took Franklin County the first four months of the Pandemic to exceed 542 total cases, and it has taken Franklin County a little less than the last three months to double the total number of cases we had in August of this year.

This number (542 new cases in a single month) still represents the highest monthly total Franklin County has ever recorded in the lifetime of the pandemic within the county, and as such represents significant and dramatic community spread of the virus in Franklin County, as seen the chart below
