UNC Research Study

Brain Functioning and Cognitive Rehabilitation in Veterans

Are you a Veteran?

Have you been diagnosed with:

Post-Traumatic Stress Disorder (PTSD)
and
A Traumatic Brain Injury (TBI)?

If so, you may be eligible to participate in a research study that aims to test ways to improve brain function.

The study involves:

- 8 to 10 hours of data collection at UNC, for which you'll be paid \$250.
- Using an iPod Touch® to practice techniques for improving memory and planning skills
- Two in-home support sessions involving a family member or friend.
- 8 to 10 hours of data collection six months later, for which you'll be paid an additional \$250.
