REQUEST FOR QUALIFICATIONS (RFQ)
CAPITAL AREA MPO
TRIANGLE STRATEGIC RAIL INFRASTRUCTURE INVESTMENT STUDY

PURPOSE

The North Carolina Capital Area Metropolitan Planning Organization (MPO), in partnership with the Durham Chapel Hill Carrboro MPO, is inviting qualified consulting firms or persons to submit Statements of Qualifications, Interest, and Experience to perform a study analyzing planned and programmed rail-related projects in the region to develop a regional strategy for prioritizing and funding improvements that will enable future implementation and expansion of passenger rail services in the Triangle region, particularly along the North Carolina Railroad corridor and the NCDOT S-Line Corridor. The intent behind this effort is to develop a regional strategy for investing in infrastructure improvements, supporting or submitting grant applications, prioritizing various funding sources for said improvements, and to craft a regional consensus between the two MPO's and other partners on the priorities and strategies moving forward.

LEAD AND SPONSORING AGENCY

The Federal Aid Highway Act of 1962 required that transportation projects in urbanized areas of 50,000 or greater in population be based on a continuing comprehensive urban transportation planning process undertaken cooperatively by the states and local governments. In an effort to complete this transportation planning process in an effective manner, the North Carolina Capital Area Metropolitan Planning Organization was created. The current CAMPO planning area boundary encompasses over 1,600 square miles and a population of more than 1,000,000.

CAMPO is tasked with providing a regional, comprehensive, and cooperative planning process that serves as the basis for the expenditure of all federal transportation funds in the area. Under Section 134 of the

Federal Highway Act of 1973, MPOs are required to prepare long range transportation plans for the planning area with a minimum of a 20-year planning horizon.

The Town of Cary serves as the Lead Planning Agency for CAMPO. The MPO is required to complete the transportation planning process in a continuing, cooperative, and comprehensive manner.

BACKGROUND

The Triangle Region has long been planning for passenger rail in the region. A commuter rail project has been anticipated in the regional long range Metropolitan Transportation Plan for over 20 years. Amtrak services have been provided through NCDOT for many years serving the inter-city market, and those frequencies have been increased in recent years and are expected to increase further as the state continues to implement the S-Line project and related improvements. The county transit plans have contemplated various forms of passenger rail over the years including a commuter rail service between Garner and Durham operating on an 8-2-8-2 schedule. Various road improvements have been planned or implemented with a goal of reducing or eliminating at-grade crossings in the rail corridors.

As more information has come to light through recent commuter rail studies, NCDOT grant awards, and other plans, the Capital Area MPO and Durham-Chapel Hill-Carrboro MPO governing boards have each established Rail Subcommittees to chart a path forward for the region to be strategic in evaluating, prioritizing, partnering on, and funding various rail-related transportation improvements that would eventually enable the implementation of passenger rail service along the NCRR and/or S-Line corridor that could serve the communities along the corridors at with at least an hourly daily frequency. In order to achieve this vision, the region needs an agreed-upon strategy for building infrastructure, pursuing grant funding, completing studies, and other activities that are required in service to that vision.

The two MPO's are jointly funding this technical study for consultant assistance with evaluating current projects identified in the 2050 Metropolitan Transportation Plan, the 2024-2033 Transportation Improvement Program, and through various local and NCDOT-led planning and project efforts. The technical study outcome will be a road and rail project prioritization program that anticipates state, local, and federal funding sources. The results will support MPO planning and programming projects critical to improving future regional passenger rail service feasibility.

The scope of work described herein is general in nature in the hopes that consultant assistance can guide the region toward a strategy for prioritizing and implementing the necessary improvements that will enable future passenger rail service implementation.

SCOPE OF SERVICES

The Capital Area MPO (CAMPO) Executive Board and Durham-Chapel Hill-Carrboro MPO (DCHC) Board appointed subcommittees to investigate alternatives for delivering incremental railroad infrastructure investments benefitting future freight and passenger rail services. The recent Greater Triangle Commuter Rail Feasibility Study, conducted by GoTriangle, indicated that the cost for providing a commuter-style rail service is prohibitive in the short-term. The MPO Boards want to enhance future increased passenger rail service potential through targeted road and rail network infrastructure improvements that benefit today's rail travel and lowers future passenger rail project delivery costs.

Working toward a goal of at least hourly passenger rail service in the Triangle Region along with current and future Amtrak inter-city services, the MPO's want to chart a critical path infrastructure project program to facilitate increased passenger rail frequency implementation. The program should suggest project implementation funding resources. Implementation recommendations should reflect the projects', or project clusters', likely competitiveness in NC STI SPOT prioritization and other current federal competitive funding resources including those established in the Bipartisan Infrastructure Law. The projects should include, but are not limited to, roadway crossings, grade separations, safety improvements, track and siding improvements, railyard relocations, etc. The implementation strategy should designate appropriate lead agencies for project planning, development, financing, and delivery including potential grant applications. The strategy should also include a methodology or strategy for determining appropriateness of utilizing county transit district funds for interim improvements. The consultant should identify additional project benefits like safety, multimodal travel options, network connectivity, rail freight movement enhancements, environmental improvements, equitable outcomes, etc.

Consultant assistance is desired in reaching consensus among regional partners including the transit agencies, counties, MPO's and NCDOT on priorities and implementation schedule. This consensus will further define and refine the Triangle's multimodal vision including regional passenger rail service. The prioritization process will be applied as an overarching decision-making structure prioritizing grant funding applications and locally collected transit taxes and fee investments.

This scope of services will focus on the North Carolina Rail Corridor through the two MPOs' planning areas and the S-Line corridor through the CAMPO planning area. The recommendations should identify conflicts with current local land use planning efforts locally. It is anticipated that a list of subsequent in-depth planning studies may be recommended as an outcome of this study. This work should target a 2055 horizon year so as to be incorporated into the region's priorities in the 2055 Metropolitan Transportation Plan.

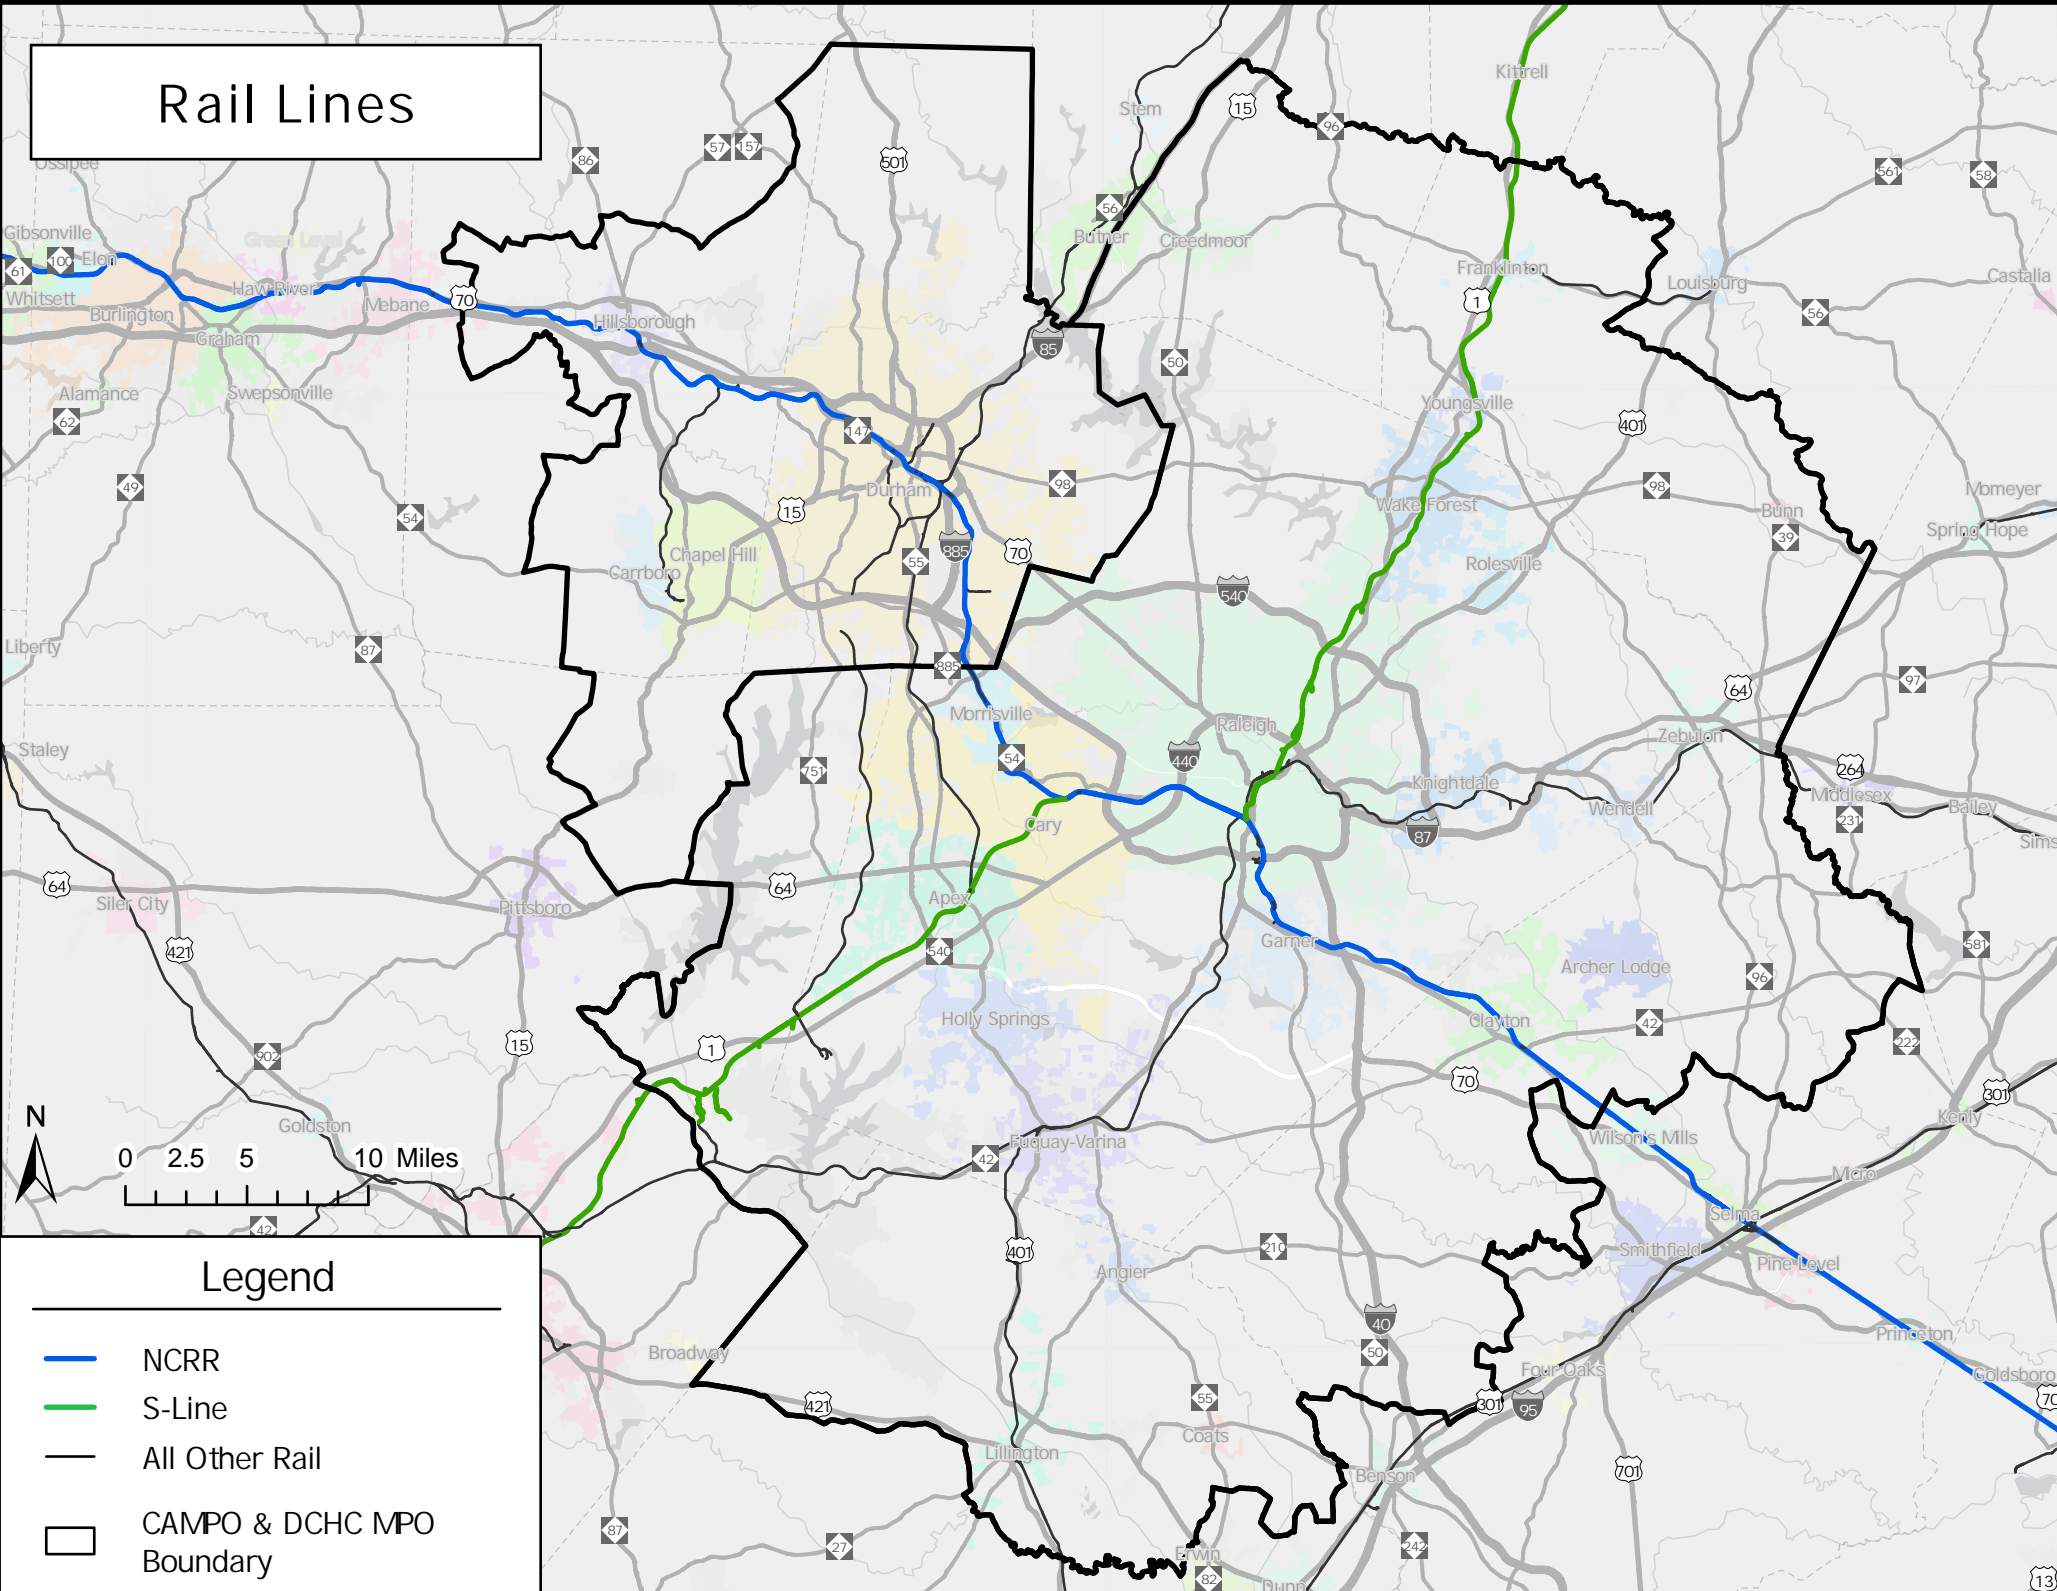

Services desired to be performed by the consultant include:

- Conduct a visioning discussion with the two MPO Rail Subcommittees to determine consensus on regional vision for desired future passenger rail services and validate the study geography;
- Conduct an assessment of funded and non-funded TIP, MTP, and other planning process identified projects to determine the current planning and project development landscape;
- Develop a logical project implementation strategy, including necessary critical-path projects, identification of projects which may be competitive for state or federal funding sources, and identification of projects which may be good candidates for funding as a state/local match for competitive federal funding;
- Recommend a decision-making framework to assist the counties and MPO's with determining eligibility or priority for MPO discretionary and county transit plan funding to advance the strategic rail program;
- Identify and recommend additional planning studies necessary to refine recommendations or advance projects;

- Develop mapping/visualization to explain recommended implementation strategy, including how the projects support 2055 MTP goals;
- Conduct regular project check-ins with MPO and County staff to maintain deliverable progress; and
- Present study results to the two MPO's technical and policy boards, including presentation and discussion with the two MPO Rail Subcommittees.

The following series of maps depict an overview of many of the planned and programmed projects that will be among the items considered for this work.
