## 1. Introduction

## 1. Introduction

#### Wake Transit Program Background

In 2016, the governing boards of GoTriangle, CAMPO, and Wake County adopted the Wake County Transit Plan, including the Wake County Transit Financial Plan and the Transit Governance Interlocal Agreement (ILA), which guides the ongoing planning, funding, expansion, and construction of projects in the Plan. On November 8, 2016, Wake County voters approved a levy of a half-cent sales tax to fund improvements and the expansion of the county's public transportation network. Local sales tax went into effect on April 1, 2017 and is the primary funding source for the plan. This series of events set into motion a transformative vision for transit in Wake County. This vision, which is clearly defined within the Wake County Transit Plan, was built upon a comprehensive and participatory process that included an assessment of the type and scale of transit services needed in Wake County, as well as the values and priorities of residents, employers, and regional stakeholders.

Included in the ILA is creation of the Wake County Transit Planning Advisory Committee (TPAC), a team charged with facilitating planning activities and recommending funding for implementation elements reflected in the adopted Wake County Transit Plan. It is comprised of members from all of Wake County's municipalities, plus GoTriangle, the Capital Area Metropolitan Planning Organization (CAMPO), Wake County, North Carolina State University (NCSU), and Research Triangle Park (RTP). One of the TPAC's most notable responsibilities is the production of the recommended annual Wake Transit Work Plan, which serves as the vehicle for more detailed and immediate transit plan investment decisions to be made for Wake County. Work Plans have been developed by the TPAC in cooperation with the two designated Wake Transit lead agencies, CAMPO and GoTriangle, since Fiscal Year (FY) 2018.

Wake Transit Work Plans are comprised of annual operating and capital budgets for transit investments, updates to financial assumptions guiding the solvency of the plan, multi-year operating and capital programs guiding the planning for investments to be made in future years, and project-level agreements. Work Plans are developed every winter and spring preceding the ensuing fiscal year that the Plans are intended to cover. Feedback received through the public review process is considered and incorporated into the final Work Plan that is recommended by the TPAC and considered for adoption by the CAMPO and GoTriangle governing boards before June 30<sup>th</sup> of each year.

#### **TPAC** (Transit Planning Advisory Committee) **TPAC Members** (ILA) An Interlocal Agreement was developed and signed to establish a Wake County decision-making process where all stakeholders have a voice. **Research Triangle Park** GoTriangle CAMPO NCSU Apex Transit Planning Advisory Committee (TPAC) is the technical team TPAC Carv charged with implementing the adopted Wake Transit Plan. **Fuquay-Varina** Garner **Holly Springs** Knightdale **Provisions** have Morrisville been made for TPAC makes recommendations on how the dollars are spent Raleigh weighted voting Rolesville Wake Forest Wendell **Zebulon** Policy decisions are sent to the governing boards simultaneously for approval important for members to be engaged to influence Triangle decision making

Wake Transit Program Organizational Flow Chart

#### Recommended FY 2024 Wake Transit Work Plan Overview

As the next iteration of the annual Wake Transit Work Plan, the Recommended Fiscal Year (FY) 2024 Wake Transit Work Plan outlines the transit investment that will receive funding in the upcoming fiscal year, which runs from July 1<sup>st</sup> of calendar year 2023 to June 30<sup>th</sup> of calendar year 2024. The Recommended FY 2024 Wake Transit Work Plan balances the careful use of taxpayer dollars with thoughtful investment in transit. Enclosed are:

- The Recommended FY 2024 Wake Transit Operating and Capital Budgets and corresponding project sheets (project profiles);
- Updated financial assumptions for key metrics and parameters that drive the financial solvency of Wake County Transit Plan implementation for FY 2024 and beyond, including the use of a placeholder scenario for the Greater Triangle Commuter Rail Project because, at the time of publication of the Recommended FY 2024 Work Plan, no decision on the project's future had been made (see Chapter IV for more information);
- Multi-Year Operating Program and the Capital Investment Plan (included in the Appendix), serve
  as planning tools that detail future investments that are anticipated to receive funding in future
  Wake Transit Work Plans. Please note that project scopes and financial details associated with
  future-year projects will be refined during the annual development process associated with the
  appropriate future-year Work Plan.

Specific operating and capital funding agreements will be executed for each implementation element

adopted within the FY 2024 Wake Transit Work Plan to detail the expectations, roles, and responsibilities of all parties. No Wake Transit Tax Revenue shall be spent prior to execution of corresponding operating and/or capital agreements.

The Recommended FY 2024 Wake Transit Work Plan was developed to implement the most recent version of the Wake County Transit Plan, which was adopted by the CAMPO and GoTriangle governing boards in April 2021. This update to the original Wake County Transit Plan extended the fiscally constrained horizon of the plan an additional three (3) years, out through FY 2030. It took stock of the transit investments and projects originally planned through FY 2027, considered the impacts and performance of investments accomplished to date, and reevaluated remaining programmed transit investments based upon:

- Available financial resources and schedule feasibility through the extended 2030 horizon;
- Priorities and expected outcomes from transit investments that are informed by transit implementation partners and robust public and stakeholder input; and
- The current and future market demand and associated need for transit investments.

One result of this process was the rescheduling and rebalancing of investments programmed for future years in previously adopted Work Plans to align with updated revenue assumptions that reflect the economic impacts of the COVID-19 pandemic, as well as the findings of further feasibility studies particularly for significant capital projects. All subsequent Work Plans, starting in FY 2022, reflect this rescheduling and rebalancing of investments through FY 2030; and have been designed to implement the vision detailed in the adopted Wake County Transit Plan.

#### **Next Steps**

The Recommended FY 2024 Wake Transit Work Plan will be released for public review and comment May 1st to May 14th, 2023. Input received will be carefully considered by the TPAC for incorporation into the Adopted FY 2024 Wake Transit Work Plan. As specified in the Wake Transit Governance Agreement, the Work Plan will not be considered as officially put into action until it has been recommended by the TPAC and adopted by the CAMPO Executive Board and GoTriangle Board of Trustees.

#### FY24 Triangle Tax District: Wake Operating

## 2.2 Wake Operating – Narrative

#### Fiscal Year 2024 Revenues

A total of \$140.7 million of Revenue is budgeted in the Recommended Wake Transit Work Plan for fiscal year (FY) 2024. These dollars funded by the Wake County Tax District rely on a mixture of local funding sources, the largest of which is the half-cent local option sales tax. Administered by GoTriangle, the local sales tax went into effect on April 1, 2017 following the November 8, 2016 approval from Wake County voters to levy such a tax for the purpose of funding the county's public transportation systems. The Recommended FY 2024 Work Plan assumes the seventh full year of sales tax revenue, totaling \$125.0 million.

In addition to the half-cent sales tax, the Recommended FY 2024 Wake Transit Work Plan involves four other revenue sources which make up the additional \$15.7 million.

- A \$7 county vehicle registration tax to fund transportation systems (\$6.9 million is budgeted for FY 2024);
- A \$3 dedication from the \$8 Regional Transit Authority Registration Tax (\$2.9 million is budgeted for FY 2024);
- A portion of the 5% vehicle rental tax allocated to Wake County (\$4.8 million is budgeted for FY 2024); and
- Other Tax District revenues (\$1.1 million is budgeted for FY 2024).

#### Fiscal Year 2024 Expenditures

The Recommended FY 2024 Wake Transit Work Plan includes approximately \$37.7 million for operating costs. These operating expenditures can be categorized into three distinct groups. The first group, Total Bus Operations, accounts for dollars budgeted for expanded bus operations. The second group, Transit Plan Administration, accounts for dollars allocated to ongoing transit planning and overall transit plan implementation. Finally, the third group, Total Tax District Administration, covers expenses related to the administration of the tax district.

#### I. Total Bus Operations -- \$30.8 Million

New Bus Operations - \$0.6 million Continuation of Bus Operations Funded in Previous Work Plans - \$30.2 million The Recommended FY 2024 Wake Transit Work Plan includes \$30.8 million for Bus Operations, of which approximately \$0.6 million is for new operations, and approximately \$30.2 million is for the continuation of funding for services implemented in prior years.

#### a. Route Improvement and Expansions: \$564,988

The Recommended FY 2024 Wake Transit Work Plan continues to build on the previously approved work plans.

Biltmore Hills/Garner Service Expansion: \$164,988
 \$164,988 allocated to GoRaleigh for the implementation of Biltmore Hills/Garner service expansion, which includes realignment and increased frequency for the existing Route 5 – Biltmore Hills, as well as, weekend service for Route 20-Garner.

Northeast Wake County Microtransit Service: \$400,000
 \$400,000 allocated to Wake County to provide continued microtransit service in the current Northeast Wake County SmartRide service area in FY 2024. This funding is for FY 2024 only and it is anticipated that this service will continue through the Community Funding Area Program (CFAP) with a local match in FY 2025, given a successful application during the FY 2025 CFAP Call for Projects.

#### b. Continuation of Existing Service Funded in Prior Years & Other Funds: \$30.2 million

- Continuation of Existing Service Funded in Prior Years: \$28.4 Million
   The Recommended FY 2024 Wake Transit Work Plan continues the initial investments made in the previous years of Wake Transit Plan implementation. These include several new routes and increased span and frequency that were initially budgeted in previous Wake Transit Work Plans to be implemented by the City of Raleigh, Town of Cary, Wake County, Town of Wake Forest, Town of Apex, Town of Morrisville, and GoTriangle. Additional information regarding these services may be found in the "Project Sheets for Continuing Projects Initiated in Prior Fiscal Years" section of the appendix and previous years' Adopted Wake Transit Work Plans.
- Operations and Maintenance of Raleigh Bus Facilities: \$593,613
   \$593,613 allocated to The City of Raleigh to perform regular maintenance on bus facilities (bus stops, park and rides, etc.) and Maintenance of bus facilities including power washing, refuse pickup, and amenity replacement when damaged. Regular upkeep of these transit facilities ensures that riders have clean and comfortable amenities when using the transit system.
- Other: \$1.2 Million

Other funds for FY 2024 Bus Operations include an allocation of \$170,170 for fare strategy initiatives associated with mobile ticketing and fare capping, and an

allocation of \$197,788 will be authorized for the continuation of the Youth GoPass Program. The Recommended FY 2024 Wake Transit Work Plan also includes \$837,785 that will remain in the Community Funding Area Program's dedicated fund balance. Additional information regarding these projects may be found in the "Project Sheets for Continuing Projects Initiated in Prior Fiscal Years" section of the appendix and previous years' Adopted Wake Transit Work Plans.

#### 1. Transit Plan Administration -- \$6.3 Million

New Transit Plan Administration - \$0.8 million Continuous Transit Plan Administration - \$5.5 million

#### A. New Transit Plan Administration: \$754,342

A total of \$150,000 is included for the City of Raleigh to hire one new full-time equivalent employee (FTE). The new Transit Planner/Analyst will work with the fixed route operating and capital service groups in GoRaleigh. The City is also allocated an additional \$148,750 for the continuation of marketing to support bus system expansion. GoTriangle will consolidate individual FTE related projects while increasing the project funding due to inflation, realignment of FTE resources, and additional increase of legal and facility resources at a cost of approximately \$269,633. The FTE's will be funded by a combination of Wake Transit and non-Wake Transit revenues and will focus on various GoTriangle construction related projects that are currently underway and in advance planning. Like GoTriangle, CAMPO will also consolidate individual FTE related projects while increasing the project funding due to inflation, increased labor expenses for which the assumed 2.5% annual cost escalation assumed with Wake Transit multi-year operations programming has not kept pace, as well as costs associated with CAMPO's Lead Planning Agency (LPA) switch at a cost of approximately \$185,959.

#### B. Continuation of Existing Transit Plan Administration: \$5.5 Million

The Recommended FY 2024 Wake Transit Work Plan allocates approximately \$5.5 million originally budgeted in prior years for staffing, marketing, and other administration costs. Funds are allocated to GoTriangle and CAMPO as designated lead agencies to continue to employ staff to direct and implement activities for the Wake Transit program. The City of Raleigh is allocated funding for 10 FTEs (full-time equivalent) and the Town of Cary is allocated funding for 5.5 FTEs. Also included in this budget are dollars related to marketing, customer and community surveys, customer feedback system, contracted services, property maintenance and appraisals, leases, office expenses, and other legal and administrative expenses. Additional information regarding these and other prior year recurring expenses may

be found in the "Project Sheets for Continuing Projects Initiated in Prior Fiscal Years" section of the appendix and previous years' Adopted Wake Transit Work Plans.

#### 2. Total Tax District Administration -- \$635,734

New Tax District Administration - \$0 Continuous Tax District Administration - \$635,734

Tax District Administration provides financial and regulatory oversight of the tax district. The Recommended FY 2024 Wake Transit Work Plan includes dollars similarly budgeted in prior years for staffing, financial advisor services and auditing services. Additional information regarding these prior year recurring expenses may be found in the "Project Sheets for Continuing Projects Initiated in Prior Fiscal Years" section of the appendix and previous years' Adopted Wake Transit Work Plans.

Integrated Mobility Innovation (IMI) Grant to implement the Northeastern Wake County Rural Microtransit Service as a pilot. This service, GoWake SmartRide NE as its branded, started operations in June 2022 and will operate at least until July 2023. GoWake SmartRide NE provides a curb-to-curb service in the Towns of Rolesville, Wendell, Zebulon, and parts of Knightdale in addition to the unincorporated regions of Wake County in between those municipalities. For this pilot service, Wake chose to suspend direct user fares and covered the lost revenue with federal ARP/CRSA funds. The pilot service is operating Monday through Friday from 6AM to 7 PM.ServiceAgencyWake CountyThis implementation element of the FY 2024 Wake Transit Work Plan provides enough funding to cover the remaining cost of one (1) year of operating expenses. During FY 2024, representatives from the Towns of Wendell, Zebulon, Rolesville, and Knightdale will partner with Wake County to apply for funding through the FY 2025 Community Funding Area Program call-for-projects to implement a more sustainable funding source for the service. This effort will be coordinated with the Wake Forest/ Rolesville microtransit project recommended in the FY 2025. In FY 2024 Wake County, as allowed by available funding, will make best efforts to align fare / suspended fare decisions with other area transit providers.Service SpanServiceDuring FY 2024, GoWake Access will also be working to right size the number of Major4 Vehicles in Operation Frequency	roject )	TO005- G3	Project Category	Bus Operations	Project Subcategory	Other Bus Service
In 2020, Wake County was awarded the Federal Transit Administration's (FTA) Integrated Mobility Innovation (IMI) Gran to implement the Northeastern Wake County Rural Microtransit Service as a pilot. This service, GoWake SmartRide NE is branded, started operations in June 2022 and will operate at least uniti July 2023. GoWake SmartRide NE provides a curb-to-curb service in the Towns of Rolesville, Wendell, Zebulon, and parts of Knightfalde in addition to the revenue with federal ARP/CRRSA funds. The pilot service is operating Mondry through Friday from 6AM to 7 PM. This implementation element of the FY 2024 Wake Transit Work Plan provides enough funding to cover the remaining cost of one (1) year of operating expenses. During FY 2024, representatives from the Towns of Wendell. Zebulon, Relesville, and Knightfale will partner with Wake County to apply for funding through the FY 2025 – 2030 Wake Bus Plan, which is expected to begin service around FY 2025. In FY 2024 Wake County, as allowed by vanilable funding, will meast shraight or ight size the number of vehicles and optimize the user interface and vehicle scheduling software. Douring FY 2024, GoWake Access will also be working to right size the number of vehicles and optimize the user interface and vehicle scheduling software. Douring FY 2024, GoWake Access will also be working to right size the number of vehicles and optimize the user interface and vehicle scheduling software. Douring FY 2024, GoWake Access will also be working to right size the number of reliability and decreasing wait times. This conversation will also cover expectations on future fares. Lastly, in addition to the funding allocation from Wake Transit Tax Proceeds, Wake County and GoWake Access will appropriate at least \$144,000 in FY 2024 Wake County and GoWake Access will appropriate at least \$144,000 in FY 2024 Wake County and GoWake Access will appropriate at least \$144,000 in FY 2024	Proiec	t Descri	otion:		Project at a G	lance

## 3.2 Wake Capital – Narrative

The Recommended FY 2024 Wake Transit Work Plan includes capital funds for vehicle acquisition and the planning, design, and construction of major infrastructure required to support new transit service and expansions. In future years, capital projects contemplated in the Wake County Transit Plan are dependent on several factors outside of the Wake Transit Program, including successful receipt of federal and/or state grant awards.

#### Fiscal Year 2024 Revenues

The Recommended FY 2024 Wake Transit Work Plan includes \$199.3 million for capital projects. These projects are funded by a combination of local revenues, allocation from the Wake capital fund balance, and federal funds.

#### Fiscal Year 2024 Expenditures

#### I. Bus Infrastructure -- \$51.6 Million

The Wake County Transit Plan envisioned capital infrastructure to support a rapidly growing local bus network. This infrastructure includes transfer points, transit centers, park-and-ride lots, bus stop and sidewalk improvements, bus maintenance facilities, street-side facilities, advanced technologies, and other improvements. The Recommended FY 2024 Wake Transit Work Plan continues to build upon the investments for which funding has been allocated in previous Work Plan years to support the implementation of the Wake Bus Plan, a multi-year bus operating and capital plan. The current Wake Bus Plan utilized to inform the FY 2024 Wake Transit Work Plan was adopted in 2016 and includes bus service expansion investments through 2027. This plan is in the process of being updated to go through FY 2030 with anticipated adoption mid-FY 2023. Once adopted, the updated version of the Wake Bus Plan will be utilized to inform the FY 2025 Wake Transit Work Plan. For FY 2024, funds are allocated for improvements that lay the groundwork to support future service expansion when implemented and offer an improved passenger experience on many of the existing services.

<u>Operations and Maintenance Facilities: \$47.6 million</u>
 The Recommended FY 2024 Work Plan allocates the following for operations and maintenance facilities:

- \$26.0 million allocated to the Town of Cary in FY 2024 to replace the current GoCary operations center located at 1107 Trinity Rd which is currently being leased. These funds will be used in addition to \$35 million of Wake Transit Funds that were allocated in FY 2022 for construction and \$13 million in grants and community project earmarks received in FY 2023 by the Town of Cary.
- \$20.0 million allocated to the City of Raleigh for construction of a new Paratransit Operations and Maintenance Facility that would accommodate both GoRaleigh Access and GoWake Access operations. The new facility would provide both operations adequate space to accommodate existing and future growth of their paratransit programs.
- \$1.6 million allocated to GoTriangle to cover the Wake County Share for the continued expansion of the Bus Operations and Maintenance Facility at 5201 Nelson Rd, Morrisville, other funding sources will include Durham and Orange County transit tax revenues.

#### B. Bus Stops, Park & Ride Facilities, and Transit Centers: \$2.9 million

The Recommended FY 2024 Wake Transit Work Plan provides the following funds for bus stops, park and ride facilities, and transit centers in FY 2024:

- \$1.2 million, approximately, to the City of Raleigh for bus stop improvements, up to 27 standard stops and 1 high volume stop throughout the GoRaleigh bus network. These locations will include improvements that will meet Americans with Disabilities Act (ADA) standards and have passenger amenities ranging from benches to shelters.
- \$1.2 million, approximately, is allocated to GoTriangle and slated to design and construct bus stops for existing and future services and make improvements to existing park-and-ride facilities within Wake County.
- \$0.5 million allotted to the Town of Cary for bus stop improvements and continue design and construction of bus stops to support future 9A route.

#### C. <u>Technology Improvements: \$1.1 million</u>

The Recommended FY 2024 Wake Transit Work Plan reserves approximately \$1.1 million for funding technology initiatives that support the Four (4) Big Moves. The moves identified in the voter-approved Wake County Transit Plan are (1) Connect regionally; (2) Connect all Wake County Communities; (3) Frequent and Reliable Urban Mobility; and (4) Enhanced Access to Transit.

#### II. Vehicle Acquisition -- \$3.6 Million

The Recommended FY 2024 Wake Transit Work Plan provides the following funds for vehicle acquisition to support transit services in FY 2024:

- \$2.1 million in Wake Transit funds is allocated to GoTriangle to replace and repower existing buses and purchase four (4) new paratransit vehicles. GoTriangle will utilize a combination of local and Wake Transit funds to complete the FY 2024 vehicle acquisition projects.
- \$1.5 million, approximately, is allocated to the City of Raleigh. Of this, \$714,769 is intended to purchase one (1) new bus, the vehicle will likely be a compressed natural gas (CNG) model. The City will also be appropriated \$541,327 to replace four (4) paratransit vehicles for demand-response/paratransit operations and one (1) expansion paratransit vehicle. Lastly, the City of Raleigh will utilize \$200,000 to continue expansion of the GoRaleigh support vehicle fleet.

#### III. Bus Rapid Transit -- \$143.2 Million

The City of Raleigh is allocated \$57.3 million for the Wake Bus Rapid Transit (Wake BRT) Southern Corridor project to finalize design and provide the local match for construction, right of way, and vehicle acquisition for Federal Transit Administration (FTA) Small Starts Grant of \$85.9 million. The Wake BRT Southern Corridor will provide frequent (10-15 min peak and 15 min weekend) and reliable transit service along the corridor that will include 50% dedicated transit lanes and BRT branded stations.

#### IV. Community Funding Area Program -- \$661,935

The Town of Apex is allocated \$429,275 to conduct a Future Transit Prioritization Study, Bus Stop Enhancements to the GoApex Route 1, and Pedestrian Improvements along Saunders Street & Hinton Street near Apex's historic downtown. The Town of Knightdale is allocated \$232,660 for sidewalk and crosswalk enhancements along Knightdale Boulevard and Old Knight Road, specifically along the Route 33 alignment.

#### V. Capital Planning -- \$250,000

CAMPO is allocated \$250,000 for three (3) planning studies that will review and update previous versions that were adopted. They include \$80,000 to cover the Wake Transit share of an update to the Locally Coordinated Human Services Plan to reflect the new Wake Bus Plan and align with any alternations to the region's planning and programming of bus services. Additional funding for this project will come from CAMPO. Additionally, \$20,000 is allotted for an update to the Community Funding Area Program Management Plan. Lastly, \$150,000 has been allocated in FY 2024 for an update to the Wake Transit Vision Plan that will extend the planning horizon and guide Wake Transit projects through FY 2035. This update will take approximately two years and as such will require \$150,000 of funding in both FY 2024 and FY 2025.

#### VI. Reserve for Future Projects and Debt Service – N/A

Future years of Wake County Transit Plan implementation require an extensive capital outlay for major infrastructure projects. The original Wake County Transit Plan was modeled after establishing a five (5) percent (%) capital fund balance as an overall reserve and measuring the plan's financial health and resources specified in the operating fund. During the process to update the Wake County Transit Plan, the capital fund balance was increased to include 10% of the assumed Wake BRT project costs and maintained a 5% rate for all other capital projects. This put the total rate for the full outlay of expenditures at 6.4%. The dedicated capital reserve balance is anticipated to meet the required amount by the end of FY 2023.

#### VII. Reserve from Future Projects – \$9.7M

The Recommended FY 2024 Wake Transit Work Plan includes an allocation of \$9.7M from the previous year's capital fund balance to fund capital projects included in the work plan.

## 3.3 Wake Capital – Detail

Project Bus Stop Improvements

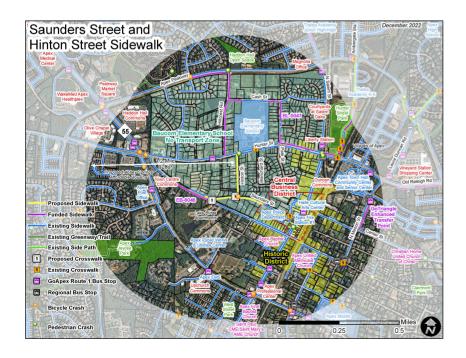

#### **Project Description:**

As part of the Community Funding Area Program, the Town of Apex will construct pedestrian improvements along Saunders Street and Hinton Street near downtown Apex. This project will provide new pedestrian access to bus stops serving the GoApex Route 1, GoCary's Apex-Cary Express, and GoTriangle's Route 305 as well as create safe and active routes to school, and create a complete pedestrian route to Historic Downtown Apex.

The project includes construction along Saunders Street, Hinton Street, and West Chatham Street of approximately 2,065 linear feet of 5-foot, concrete sidewalk and the installation of approximately 1,285 feet of curb and gutter along the sidewalk.

This project is funded in majority through the LAPP program at 80% with CFAP funding the remaining 20%. This project will also include two (2) high visibility crosswalks, pending NCDOT approval.

Project Maintenance Facility Subcategory Improvements

#### Project Description:

The ongoing fleet and facilities study is evaluating constraints and needs for maintenance, storage, fueling, and servicing capacity as well as work-flow efficiency at the GoTriangle Nelson Road bus operations and maintenance facility. The outcome of this study will include site selection, schematic design, and cost estimates for a new and/or expanded facility. The study includes a regional coordination element to identify opportunities for shared facilities for vehicle storage, servicing, and/or repairs. The study has identified onsite expansion and renovation of the current Nelson Road facility as the most cost-effective option to address current needs and provide opportunity to meet future fleet needs over the course of the useful life of the renovated facility (40+ years). The completed study will include phases and associated costs of handling the fleet required to operate the services identified in the Wake Bus Plan.

The GoTriangle Operations and Maintenance Facility at 5201 Nelson Rd in Morrisville, NC was originally constructed in 1998. In 2006, the facility was updated to add space for administrative functions. GoTriangle is currently operating near capacity of the existing facility. GoTriangle's Regional Fleet and Facilities Study recommends the design, renovation, and expansion of their Nelson Road Operations and Maintenance Facility. This capital improvement will add the needed capacity required to accommodate GoTriangle's projected increase to its fixed-route fleet, including vehicles needed for operations in Wake, Orange, and Durham Counties, through 2050. The renovation and expansion will also include updates to better accommodate the facility's administrative functionality. The Regional Fleet and Facilities study has also projected the need to relocate GoTriangle's paratransit maintenance and servicing to a new facility to reach full build-out, the funding for which is not included in this project's design and construction allocation. Facility costs to update the Nelson Road facility will be shared across GoTriangle's service areas in Wake, Orange, and Durham counties.

The currently anticipated Wake County cost share of renovating and expanding the overall facility is 55%. This 55% cost share is an increase from the original 40% anticipated cost share, was refined during the capital improvements phase of the ongoing Wake County Bus Plan, and is based upon GoTriangle's bus expansion schedule and future fleet needs for Wake County expansion services as compared to its fleet needs across the region

Maintenance Facility

#### Project Description:

The Town of Cary/GoCary will construct a Regional Bus Operations & Maintenance Facility, which will accommodate GoCary's growth for the foreseeable future, allow future expansion of service, and reduce ongoing operational costs associated with the currently leased operations facility. It may also serve as a site for fueling, repairs, and/or vehicle storage for other regional transit system vehicles.

In FY24, due to accelerating costs for labor and materials, an additional \$25,954,064 was allocated alongside of the additional \$11,787,275 in federal grants and \$1 Million in community project earmarks to ensure the completion of the project.

# 4. FY 2024 Financial Model Assumptions Update

# 4.1 Financial Model Assumptions– Narrative

#### Background

The Wake Transit Plan is a combined investment strategy which reflects a vision for transit service development governed by the "Four Big Moves": to connect regionally; to connect all Wake County communities; to provide frequent and reliable urban mobility; and to provide enhanced access to transit. As part of this effort, the Transit Planning Advisory Committee (TPAC) has assigned GoTriangle as the lead agency to update the Wake Transit Financial Plan and the financial model. Per the Transit Interlocal Governance Agreement, the financial model shall contain the operating and capital policies and guidelines mutually agreed to by the TPAC. The model also includes the multi-year capital and operating costs, as well as the liquidity targets and debt ratios relevant to rating agency metrics.

The Financial model continues to reflect the Wake Transit Plan's strategic approach in leveraging federal and state funds combined with existing and new sources of local funding in order to deliver projects that work towards the plan's overarching goals. Additionally, the plan continues to maintain the necessary liquidity measures and other metrics of fiscal health to support the goals of the Wake Transit Financial Plan while adhering to the policies of the Wake Transit Financial Guidelines approved by CAMPO and GoTriangle.

For more detail on the policies that govern Wake Transit visit: www.goforwardnc.com/wake-county

#### FY 2024 Wake Transit Work Plan Specifics and Assumptions

As detailed in the Wake County Transit Plan, the Wake Transit Work Plan is fiscally constrained and contingent upon a variety of assumptions that will evolve as critical information is modified and projections are updated to reflect actual results. As such, the Recommended FY 2024 Work Plan:

- Incorporates relevant projects from the FY 2023 Adopted Work Plan's Multi-Year and Capital Improvement programs based on the further review conducted as part of the FY 2024 Wake Transit Work Plan process
- Includes assumptions of competitive grant revenue for some Bus Infrastructure projects
- Incorporates continued investments in the Community Funding Area Program

Includes in the financial model funding allocated to select capital projects programmed past the current 2030 horizon of both the Capital Improvement Plan (CIP) and the Wake Transit Plan<sup>1</sup>. Two specific projects falling into this category include a multi-phased approach totaling \$2.12 Billion for the Greater Triangle Commuter Rail project (for more information see the call-out box below) and \$83 Million for the Wake BRT: Northern Corridor.

Additionally, overall inflation assumptions; availability of local sources of revenue and growth assumptions; competition for federal funding for projects; successful access to capital markets; and regional partnerships will continue to influence the overall financial outlook of the Transit Plan. The Recommended FY 2024 Wake Transit Work Plan does assume some changes in the FY 2024 Sales Tax projections to accommodate a growing economy, but one that is growing at a slightly slower pace this fiscal year.

The FY 2024 Financial Model Assumptions Template details the assumptions made in the Wake Transit Financial Plan adopted by GoTriangle, CAMPO, and the Wake County Board of Commissioners and compares those to the assumptions used to prepare the Recommended FY 2024 Wake Transit Work Plan. Operating and capital costs included in the model are shown in the multi-year operating and capital improvement programs contained in the Recommended FY 2024 Transit Work Plan Appendix.

<sup>1</sup> The Wake Transit Plan must be updated every four (4 years to continue to extend its planning and incorporate further investment needs. This second update, which will push the horizon year out an additional five (5) years to 2035, is included as a capital project in this Recommended FY 2024 Wake Transit Work Plan.

**Greater Triangle Commuter Rail Process and Assumptions:** As of the publication of the Recommended FY 2024 Wake Transit Work Plan, the technical analysis for the Greater Triangle Commuter Rail (GTCR) Phase 2 Feasibility Study had concluded. This study reported significantly higher costs and larger technical challenges associated with completing the full commuter rail corridor than anticipated and programmed in the FY 2023 Adopted Wake Transit Work Plan. The Study also noted challenges, based on expected costs and anticipated ridership, with the 50% federal match assumption in the FY 2023 Work Plan. While the Study recommended that no matching federal grants be programed for the initial stages of the commuter rail project, there is potential for federal funding in subsequent phases of the project. To reflect that no decision has been made on if or how the project should move forward, and that decision-makers wished to explore potential options for implementation, the FY 2024 Wake Transit Work Plan includes capital and operating "place-holder scenarios" for commuter rail funding.

The Greater Triangle Commuter Rail (GTCR Phase 2 Feasibility Study introduced the potential need for a phased approach for implementing the full ~38 miles from West Durham to Garner. The Study presented the following potential segments with the following track length and costs:

- Western (End Points: West Durham to RTP | Miles: ~12 | Capital Cost: \$1.6B);
- Central (End Points: Ellis Road or RTP to Raleigh Union Station | Miles: ~20 | Capital Cost: \$800M \$1B); and
- Eastern (End Points: Raleigh Union Station to Auburn Station in Garner | Miles: ~10 | Capital Cost: \$600 - \$700M)

The FY 2024 Wake Transit Work Plan capital commuter rail "place-holder scenario" allocates funding for two segments, anticipating a build out of approximately 80% of the corridor by 2037 at a total cost of \$2.1B, \$1.4B of which is assumed to be the Wake County Share of the project. The operating commuter rail "place-holder scenario" allocates \$16.1 million for the Wake County share of the first full year of annual operations in FY 2033. The FY23 work plan assumed \$28.0 million for the Wake County share of the first full year of annual operations in FY 2031. Both scenarios assume a 20% farebox recovery. It is expected that the capital and operating "place-holder scenarios" will be updated in the Wake Transit Financial Model after key decisions are made.

Commuter Rail	Growth Rate	4%	4%		
Local Bus	Growth Rate	4%	4%		
Liquidity					
Minimum Operating Fund Balance	% of Sales Tax	25%	25%	Financial Policy	Formalized Financial Policies Adopted by GoTriangle and CAMPO
Capital Projects Fund Balance % of Projects Budget Through 2032		5%	6%	Financial Policy	Original 5% Formalized Financial Policies Adopted by GoTriangle and CAMPO. Revised % included in the Wake Transit Vision Plan. The % is calculated with a 10% Fund balance for BRT projects, 5% all other capital projects.

Outcome (Overall Fiscal Health of Wake Transit Plan)	Result	Wake Transit Plan Assumption	FY 2024 Proposed Assumption	Comment	Impact/Notes
Minimum Wake Operating Fund Balance	\$, % of Sales Tax (No Lower Than 25%)	Balance of \$21.3 in FY 2020	Balance of \$72.7 M in FY 2024		Minimum policy is designed to provide operating reserves, when combined with capital that could be used in extraordinary circumstances, to meet liquidity targets. The minimum fund balance is 25% of the subsequent years adopted sales tax in the Wake Operating fund or a minimum of 90 days unrestricted cash. The amount listed is the total operating fund balance which includes the reserves.
Minimum O&M Reserve	3 Months	N/A	N/A	in each transit agency	
Minimum Wake Capital Fund Balance	\$, % of Capital Projects Planned (5% by xx)	\$80.65 M (5%) by 2020	\$150.8 M by 2024		Capital Fund Balance increased to 6.4%. Minimum balance reached and no additional transfer is needed.
Capital Asset Management Reserve	\$ accrued	228 days in 2027	381 days in 2035		
Operating Days of Available Unrestricted Cash + Cash to Debt Service	# of Days (181 days cash + 5x cash to DS = score of 1 for liquidity) (90 days cash + 2x cash to DS = score of 2 for liquidity) Operating + Capital Fund Balance/Debt Service (Greater than 2.0 = S&P A)	78 days in 2027	125 days in 2035		Recommend 90-180 days cash in operating fund; greater than 180 days when combined with capital. When operating fund cash is combined with capital fund balance, liquidity reserves rank a "1" which offsets financial flexibility tied to debt service carrying charge and farebox recovery ratio.
EBITDA Debt Service Coverage (excluding short term debt)	Local Net Revenue / Debt Service (No Lower Than 1.25)	1.26 in 2027	2.14 in 2035		Net revenues available for debt service divided by debt service.
Gross Debt Service Coverage	Local Revenue / Debt Service (No Lower Than 3.0)	low of 3.56 in 2025	low is 4.26 in 2035		
Debt to Revenue (Debt Burden)	Debt Outstanding/Total Revenues (Greater than 2.0 Debt to Revenue = S&P A)	low of 2.2 in 2030	low of 2.0 in 2035		
Debt Service Reserve	XXXX				
Capital Liquidity	Available Cash Outside of Reserves (Excess inflows/outflows)	Low of \$181K in 2024	Low of \$78.7 M in 2026		

# A. Appendix: FY 2024 - FY 2030 Multi-Year Operating Program and Capital Improvement

## Recommended FY 2024 Wake Transit Work Plan Appendix

### FY 2024 - FY 2030 Multi-Year Operating Program and Capital Improvement Plan

### **Table of Contents**

A1.	Recommended FY 2024 Wake Transit Work Plan Appendix Introduction	79
A2.	Project Sheets for Continuing Operating Projects Initiated in Prior Fiscal Years	80
A3.	FY 2024 - FY 2030 Multi-Year Operating Program Future Year Operating Project Sheets	158 168
A4.	FY 2024 - FY 2030 Multi-Year Capital Improvement Plan Future Year Capital Project Sheets	172 182

## A1. Recommended FY 2024 Wake Transit Work Plan Appendix

#### Introduction

The Wake Transit Work Plan is developed annually and includes, among other components, detailed information on projects to be implemented during the upcoming fiscal year. However, it is critical to understand that these projects are part of a broader multi-year program of projects which align with the goals of the Wake County Transit Plan. As such, this appendix focuses on projects initiated in fiscal years other than FY 2024, including operating projects initiated in prior fiscal years that continue into FY 2024 and subsequent years, as well as capital and operating projects anticipated for future investment. Together these projects make up the Multi-Year Operating Program (MYOP) and Capital Improvement Plan (CIP). The purpose of these multi-year programs is to:

- Guide future work plans
- Provide a basis for tracking projects from one year to the next
- Allow project sponsors to appropriately plan for future implementation; and
- Ensure that the projects undertaken each year are part of an effective and phased approach toward achieving the Wake County Transit Plan's "Four Big Moves"

For services and projects that are included in the MYOP and CIP for FY 2025 and beyond, each project will be reviewed prior to its incorporation into future annual work plans to ensure the project is still viable and the timing is still appropriate.

Enclosed in this appendix are investment summaries and project profiles that detail the scopes of operating projects initiated in prior years that continue into FY 2024, and the FYs 2024-2030 MYOP and CIP, which include project-level details for future investments. For future-year operating projects, project profiles are provided for projects that are planned to be initiated through FY 2025, which align with the planning horizon of short-range transit plans produced as part of the Wake Bus Plan for each fixed-route service provider in Wake County.

An update to the Wake Bus Plan, which began in FY 2021 and is carrying into FY 2023, will refine Wake County's strategic phasing of planned bus service expansion for a number of years beyond FY 2025 and will further define bus service implementation details for those future investments. With the adoption of the Wake Transit Bus Plan's Short Range Transit Plan, which will cover the planned scopes for future year projects between FY25 and FY27, additional future bus operations and capital projects may be included within this Work Plan. Additionally, once the Wake Bus Plan is complete, future Work Plans will reflect its expanded horizon.

#### **Project Description:**

Raleigh's Transit division has experienced significant growth over the last three years as a result of Wake Transit capital projects and the Wake Transit Plan's aggressive schedule for increases in bus services and supporting infrastructure. To consolidate administrative functions and staff, including administrative, planning and marketing/communications functions, the Transit division occupied the lower mezzanine space in Raleigh Union Station (RUS) in FY 2021.

The space is needed until a permanent office space is available for the division within the City of Raleigh's Civic Campus. Based upon need and availability, a combination of dedicated and shared space comprised of office, conference room, and common areas will be made available to GoTriangle staff, as the existing GoTriangle offices located on West Street, next to RUS, await redevelopment.

Project Bus Service

## **Project Description:**

GoRaleigh will continue to operate an increased Sunday service span for all its pre-FY18 routes, matching Sunday service times and frequencies to those provided on Saturdays, with the exception that Sunday service will continue to end one hour earlier than Saturday services. GoRaleigh will continue to provide service on all routes between 5 AM and 10 PM at frequencies consistent with Saturday services, which range from every 30 minutes during late morning and afternoon hours to every 60 minutes during early morning and evening hours.

Prior to FY18, GoRaleigh provided hourly service on select routes from 8 AM to 8 PM on Sundays and did not provide Sunday service on all routes. In FY24, funding for this system-wide service was increased by \$358,816.30 to reflect the increases in the City of Raleigh's operating cost per hour.

Project Subcatogo Bus Service

#### **Project Description:**

Route 300 is a regional service connecting Cary with Raleigh. It serves the Chatham St Corridor in Cary and the Western Blvd Cary in Raleigh, connecting Cary Depot, North Carolina State University (NCSU), and GoRaleigh Station in downtown Raleigh. Route 300 is operated by GoTriangle during the week (Monday through Friday) and by GoCary on weekends (Saturday and Sunday).

In 2020, GoTriangle eliminated Route 300 service between the GoTriangle Regional Transit Center (RTC) and Cary Depot, limiting its extent to Cary Depot and Downtown Raleigh. However, in concert with this reduction in service for Route 300, Route 310 began operation with a new alignment between the RTC and Cary Depot. More information on Route 310 can be found in the project details provided for Project ID TO005-X.

GoTriangle will continue to operate Route 300 between Raleigh & Cary every 30 minutes from 6 AM to 7 PM Monday - Friday, and from 7 AM to 7 PM on Saturday. These are frequency improvements from FY17 operations. Route 300 will also continue an expanded service span from FY 2017 operations, providing hourly service from 7 PM - 10:25 PM Monday-Friday, 7 PM - 9:55 PM Saturday, and 7 AM -9 PM on Sunday. Sunday service was expanded from FY18 operations, when service was provided between 7 AM and 7 PM.

In FY25, GoTriangle is expecting GoCary's cost per service hour to increase, which accounts for the \$2,505 increase in that and future fiscal years - adjusted by 2.5% year over year.

Bus Service

### **Project Description:**

Route 310 is the new service for the portion of Route 300 between Cary and the Regional Transit Center (RTC), which was served on weekdays during peak hours only. Route 310 began operations in FY 2020 providing hourly midday and evening service between the RTC and the Cary Depot, serving Morrisville and the Wake Tech RTP campus, as well as extending the 30-minute peak period service. Service between the RTC and the Wake Tech RTP Campus between 6:30am and 8:30pm will continue to operate every 30 minutes.

The currently adopted Wake Transit Plan and Wake Bus Plan have programmed that Route 310 in FY25 will feature all-day service, seven days per week at 30minute frequencies. When this service is implemented it's project ID number will transfer from TO005-X to TO005-AQ. This is the anticipated service change unless otherwise determined by the ongoing update to the Wake Bus Plan.

Project Bus Service

#### Project Description:

As part of the Community Funding Area Program, the Town of Apex has received, and will continue to receive, funding authorization for the operation of its first fixedroute circulator throughout the community. The service additionally includes complementary ADA service within 3/4-mile of the route. The service provides hourly frequencies and provides access to the route at approximately 40 bus stop locations. The scope of this project also includes expenses related to customer service, marketing and branding, and staffing to provide appropriate support for the service.

In FY24, an additional \$21,860 was allocated to this service to account for the increased cost of providing ADA paratransit with GoWake Access; the increased cost of providing fixed route service with the Town of Cary; and rightsizing the allowable staffing reimbursements.

Project Bus Service

### **Project Description:**

As part of the Community Funding Area Program, the Town of Morrisville will continue operation of a free, intra-community node-based smart shuttle. The smart shuttle operates as a shared shuttle that serves customers via designated pickup and drop-off locations, or nodes, that are served upon request rather than on a fixed schedule. Customers can request service over the telephone, on the internet, or by using a smartphone application. The service operates from 7 a.m. to 9 p.m., Monday through Friday, from 8 a.m. to 8 p.m. on Saturdays, and from 8 a.m. to 7 p.m. on Sundays.

In FY24, an additional \$19,060 was allocated to this service to account for the increased cost of providing shuttle service with the Town of Cary.

Note: The services reflected in the above table will be supported by a combination of Wake Transit revenues; other local and federal funds; and farebox revenues. As of the publication of the Recommended FY 2024 Wake Transit Work Plan, the technical analysis for the Greater Triangle Commuter Rail (GTCR) Phase 2 Feasibility Study had concluded but no decision had been made on if or how the project would move forward. Therefore, the Work Plan includes capital and operating "place-holder scenarios" for a phased implementation approach. It is expected that these "place-holder scenarios" will be updated in the Wake Transit Financial Model after key decisions are made. For more information see the Greater Triangle Commuter Rail Process and Assumptions detail on page 63. The operating commuter rail "placeholder scenario" allocates \$16.1 million for the Wake County share of the first full year of annual operations beginning in FY 2033.

<u>Note:</u> The amounts provided in the top table, "Expenses Assciated with Operating Projects", are expenses associated with programmed operating projects by funding category in the Recommended FY 2024 Wake Transit Work Plan. The amounts provided bottom table, "Remaining Capacity of the Wake Transit Model", reflect the Wake Transit Model's remaining capacity by year for allocating fund to operating projects in each of the funding categories.

## Operating Project Sheets Future Year Projects

Wake Transit Plan Implementation

### Bus Operations - TO005, 004, 003 Future Year Projects

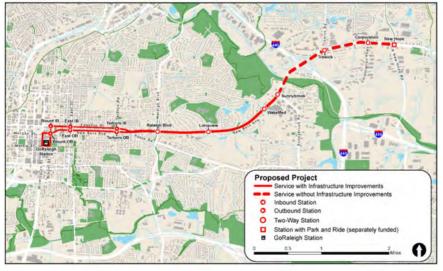

With the adoption of the Wake Transit Bus Plan's Short Range Transit Plan, which will cover the planned scopes for future year projects between FY25 and FY27, staff will develop project sheets for "Bus Operations - Future Year Projects".

## BRT Operations - TO006

\*The expenses reflected in the above table will be supported by a combination of Wake Transit revenues, federal discretionary grants, and federal loans.

\*\*As of the publication of the Recommended FY 2024 Wake Transit Work Plan, the technical analysis for the Greater Triangle Commuter Rail (GTCR) Phase 2 Feasibility Study had concluded but no decision had been made on if or how the project would move forward. Therefore, the Work Plan includes capital and operating "place-holder scenarios" for a phased implementation approach. It is expected that these "place-holder scenarios" will be updated in the Wake Transit Financial Model after key decisions are made. For more information see the Greater Triangle Commuter Rail Process and Assumptions detail on page 63.

Note: The adopted 2016 Wake County Transit Plan anticipated that costs and timing for major capital project implementation would be adjusted based on the best information available that may be refined as projects undergo further study. Assumed cost information for major capital projects included in Annual Wake Transit Work Plans is continually updated through each Work Plan development cycle to reflect findings from further project-level study, including alternatives analysis and preliminary engineering associated with the project development process. It is anticipated that costs and schedules for major capital projects will continue to be refined as better project-level information becomes available.

TC005	Bus Rapid Transit**					\$ -	\$	1,916,750		1,916,750		1,916,750	\$	13,800,250	\$ 8,050,000	\$	23,000,000	\$	50,600,500		50,600,500
SUBT	TOTAL ADDITIONAL MODELED CAPITAL					\$-	\$	1,916,750		1,916,750		1,916,750	\$	13,800,250		-	23,000,000	-	50,600,500		50,600,500
	TOTAL CAPITAL					\$ 199,290,309	*	169,122,817	-	149,177,049		237,047,779		182,931,277	\$ 182,359,371		204,660,575		1,711,633,370		1,702,403,031

\*Expenditures reflected in the above table will be supported by a combination of Wake Transit revenues; existing local, State, and Federal funds; and additional Federal and State discretionary grants.

\*\*The adopted Wake County Transit Plan anticipated that costs and timing for major capital project implementation would be adjusted based on the best information available that may be refined as projects undergo further study. Assumed cost information for major capital projects included in Annual Wake Transit Work Plans is continually updated through each Work Plan development cycle to reflect findings from further project-level study, including alternatives analysis and preliminary engineering associated with the project development process. It is anticipated that costs and schedules for major capital projects will continue to be refined as better project-level information becomes available.

\*\*\*The summarized prior year data in the All Capital Projects column includes data for both active and closed capital projects from FY18 – FY23, while the summarized prior year data in the Active Capital Project Only column includes prior year data only for capital projects still active in FY24. For the FY24 Work Plan, the prior years data has been updated to reflect that some allocated funding from prior years was never expended, and that funding was returned to the Transit Plan.

Note: The amounts provided in the top table, "Expenses Assciated with Capital Projects", are expenses associated with programmed capital projects by funding category in the Recommended FY 2024 Wake Transit Work Plan. The amounts provided bottom table, "Remaining Capacity of the Wake Transit Model", reflect the Wake Transit Model's remaining capacity by year for allocating fund to capital projects in each of the capital funding categories.
