NC Capital Area Metropolitan Planning Organization

Introduction to Programs and Processes of the NC Capital Area Metropolitan Planning Organization (CAMPO)

March 23, 2020

Welcome and Introductions

Expectations for MPO 101 **Understanding of:** NC Capital Area MPO – brief history and context Transportation planning requirements Partners and funding sources MPO work products Overview of programs and processes Wake Transit overview Relevance to you

In this presentation:

Website Resource

Opportunities for involvement

MPOs: History/Context

Advent of Highways

Laws Establishing MPOs

1959: NCGS 136-66.2 Established Thoroughfare Plans

- Roads only
- Mutually adopted by NCDOT and local governments
- 1962: Federal Law 23 USC 134 & 49 USC 1607
 - Established a <u>Continuing, Cooperative and Comprehensive</u> ("3-C") Transportation Planning Process.
 - Established Metropolitan Planning Organizations (MPOs), for all urbanized areas with populations in excess of 50,000, as a requirement for receiving federal funding.

Increasing MPO Planning Requirements

MPO Planning in the 1970s

MPO Planning Today

Since the early 1990's

New Federal Funding Legislation = New Responsibilities for MPO's

Laws since 1990

1991: ISTEA (Intermodal Surface Transportation Efficiency Act)

1998: TEA-21 (Transportation Equity Act – 21 Century)

1999: NCGS 136-66.2 "Comprehensive" Transportation Plans (CTP)

- Multi-modal: Roadways, Transit, Bicycles, Pedestrians
- Mutually adopted by NCDOT and MPO
- Added <u>Rural Planning Organizations</u> as "advisory" only

2000: NCGS 136-200.1 MPOs recognized in State Law

2001: NCGS 136-66.2(a) recognizes MPOs as regional planning entity for MPO area

2005: SAFETEA-LU (Safe, Accountable, Flexible, Efficient Transportation Equity Act – Legacy for Users)

2012: MAP-21 (Moving Ahead for Progress in the 21st Century)

2015: FAST (Fixing America's Surface Transportation) – FY 16-FY 20

- New focus on performance-based planning and expedited project delivery
 - MPOs need to be cognizant of the outcomes of their investments and actual impact on transportation operations, community goals
 - The old model of Forecast-Plan-Program-Build [and don't look back] is no longer appropriate
 - Development & monitoring of performance measures

What is an MPO?

An MPO is:

- Federally mandated and funded
- Transportation policy-making organization
- Made up of representatives from local governments and governmental transportation authorities
- Conducts the 3-C planning process in the region (<u>Continuing</u>, <u>Cooperative and Comprehensive</u>)

How are the MPO boundaries determined?

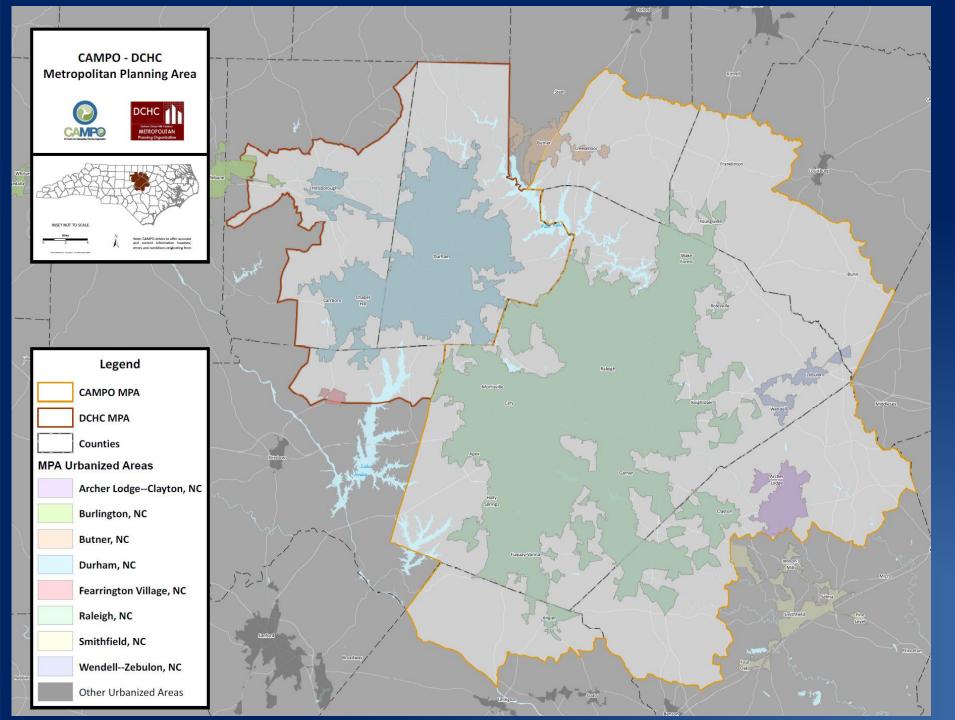

Federal regulation + Boundaries reviewed every 10 years based on census

= Existing urbanized area + 20-year forecast

CFR 23. Section 450.312

- 1. At a minimum, the MPA boundaries shall encompass the entire existing urbanized area (as defined by the Bureau of the Census) plus the contiguous area expected to become urbanized within a 20-year forecast period for the metropolitan transportation plan.
- 2. The MPA boundaries may be further expanded to encompass the entire metropolitan statistical area or combined statistical area, as defined by the Office of Management and Budget.

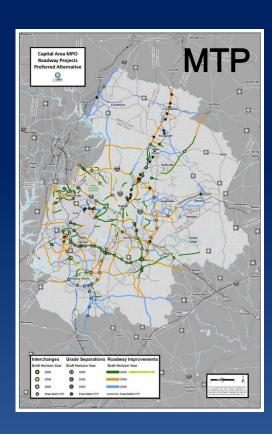

Urbanized Area vs. MPO Boundary

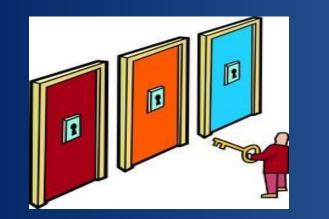

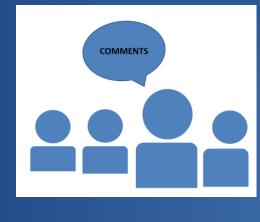

MPO Functions

- 1. Establish a fair & impartial setting
- 2. Evaluate transportation alternatives
- 3. Maintain a Metropolitan Transportation Plan (MTP)
- 4. Develop a Transportation Improvement Program (TIP)
- 5. Involve the public residents + key affected sub-groups

MPO Primary Responsibilities

(MTP) Metropolitan Transportation Plan

(formerly Long-Range Transportation Plan - LRTP)

- Must cover 20+ years, updated every 4 years
- MTP Revenues and Costs <u>must balance</u>

(TIP) Transportation Improvement Program

- Determines regional transportation priorities, in cooperation with NCDOT
- Identifies State, Federal and local funding
- Must be consistent with MTP

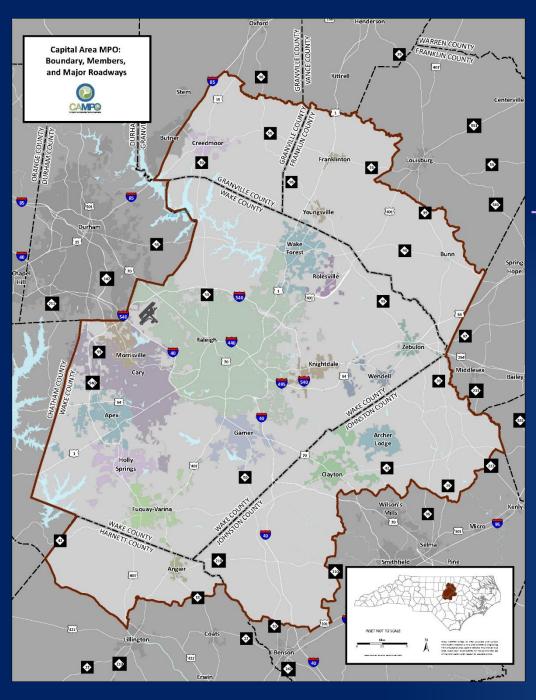

(NAAQS) National Ambient Air Quality Standards

- MTP and TIP must meet AQ emissions regulations
- Federal funding withheld if Plans not "conforming"
- AQ Modeling for DCHC and CAMPO

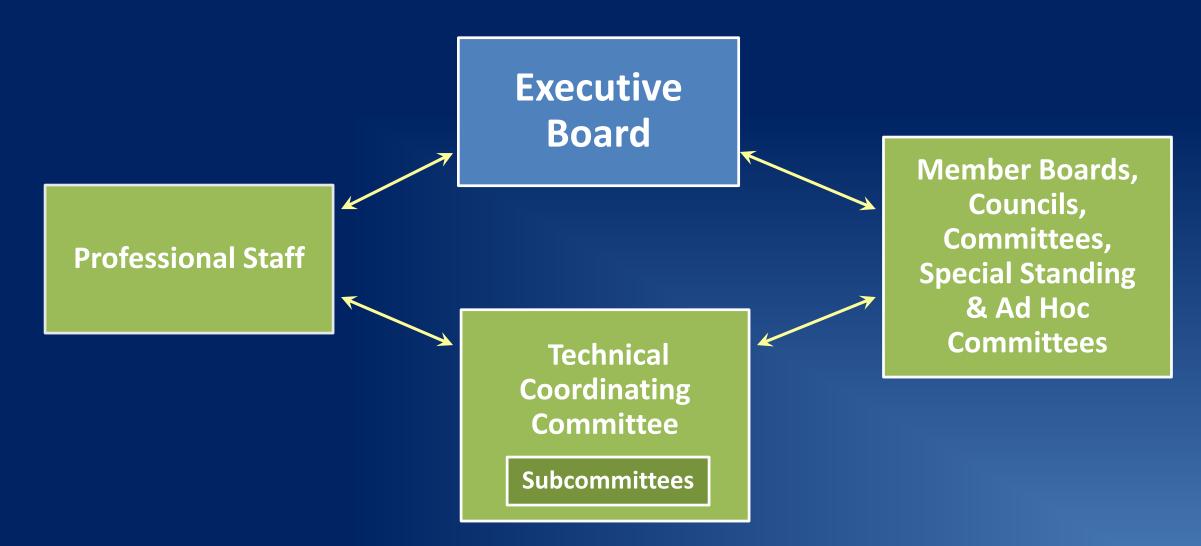

CAMPO

- Elected officials and staff representing 5 counties and 19 municipal jurisdictions
- All of Wake and parts of Franklin, Granville, Harnett, & Johnston Counties
- Combined 2017 population of 1.27 million (12% of NC)

Our MPO Structure

MPO Organizational Structure

NC MPOs & RPOs typically have two functioning committees for members that meet every 1-3 months. CAMPO's committees typically meet monthly, with breaks in July and December.

Executive Board

Executive Board (previously known as TAC)

- Policy/Executive board
- Comprised mostly of member governments' elected officials, NCDOT board member(s), and other agency representatives Makes the MPO's Decisions
- Meets 3rd Wednesday at 4:00 p.m.

Technical Coordinating Committee

Technical Coordinating Committee (TCC)

- Comprised of government and agency staff members Advises the Executive Board on technical issues
- Meets 1st Thursday at 10:00 a.m.

Members List: https://www.campo-nc.us/about-us/executive-board

CAMPO Organizational Structure

Each MPO and RPO has staff to support the Executive Board and TCC and carry out planning processes.

 \checkmark The Capital Area MPO has a full time staff of 16, + 1 part time

Executive Director

- 2 Deputy Directors
- 2 Transportation Engineer Modelers

1 Transportation Project Engineer (LAPP Manager)

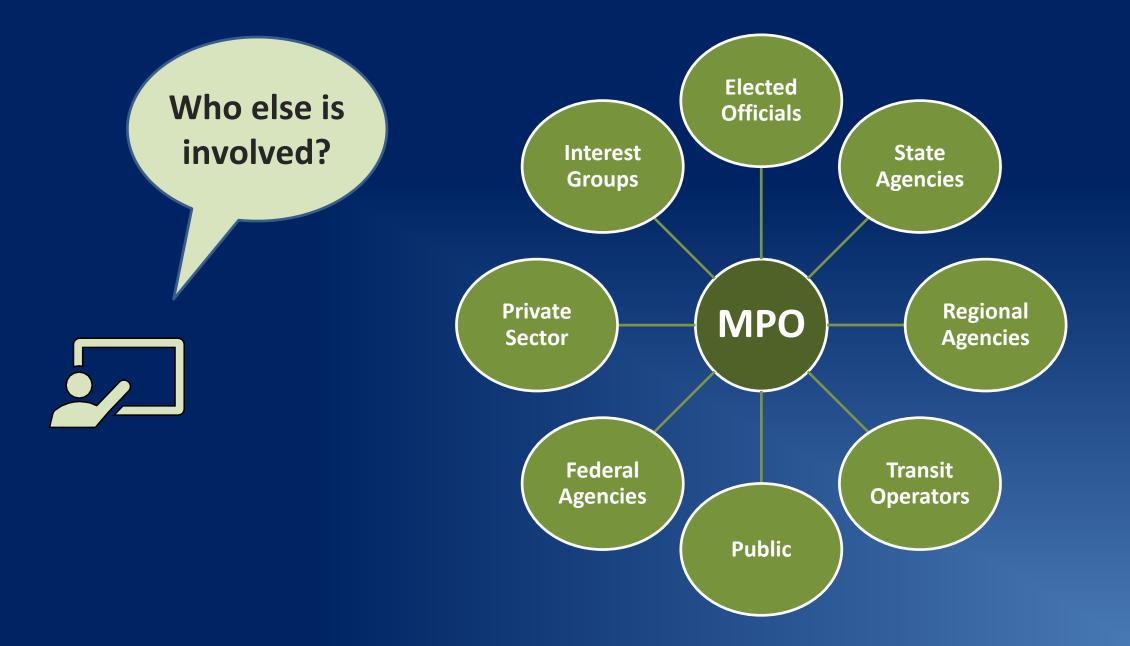

- **3** Transportation Planners
- 1 Public Engagement Planner
- 3 Wake Transit Staff
- 1 GIS Analyst
- 1 Financial Officer
- 1 Administrative Assistant
- + 1 part-time Engineering Technician

Staff Contact info: https://www.campo-nc.us/about-us/staff

Professional Staff

Our Partners

Our Partners: YOU!

- The local governments and agencies ARE the MPO
- Stakeholder groups and the public also help inform the MPO

Our Partners - YOU

Executive Board and TCC Members

- Lead communicator:
 - Distribute, coordinate, and collect information within member organization
 - Distribute and collect information within local community
- Participate as stakeholders and technical team members
 - Regional studies and planning efforts

Our Partners - YOU

Transportation Policy Priorities For the triangle metro region

KEYS TO A MOBILE FUTURE 🔎

Transportation is big. But it is always part of something bigger: economic development opportunities or healthy, active neighborhoods or greater access to jobs and education. The Triangle Metro Region – urban, suburban and rural – was home to 37% of the state's growth from 2010-17, and is expected to add another million people over the next generation. A transportation policy that enables North Carolina to continue to compete effectively must focus on 3 key areas:

REGIONAL POLICY PRIORITIES

Seven key priorities can result in fast-growing regions staying ahead of the growth curve, rural areas and small towns taking advantage of economic opportunities and every community providing complete streets and safe solutions tailored to local conditions.

- Enable critical transportation infrastructure across all modes to be addressed sooner with a statewide transportation bond
- Create a new funding source for multi-modal mobility investments tied to economic
- development projects in small towns, rural areas, and along major corridors in metro regions

The BuildNC bond is a good start, but it needs to support major multi-modal investments, not just highways. While the bond would let us invest faster, it does not increase total investment; it lets us spend tomorrow's revenue today. The state needs an economic development-focused revenue source for investments that are not well suited to the long and constrained process of the Strategic Transportation Investments (STI) program

- Minnesota's Transportation Economic Development Program could be a model for a nimble, economic-based effort -

MAKE INVESTMENTS RELIABLE AND PREDICTABLE

Remove caps and constraints on rail transit funding \rightarrow

The STI program distributes state and federal transportation dollars in a reasonable way with one exception: the caps and constraints on rail transit. Rail transit should be held to the same standards as other investments. Caps on state allocations and handcuffs on receiving state funding should be removed so that projects can compete on a level playing field and be funded on their merits. Businesses tell us that risks, uncertainties and U changing rules stifle success - transportation investment is a key business for the state and its communities.

- \$1 million invested in transit generates 4,200 job-hours; \$1 million in roadway investment generates 2,400 job-hours -

TRIANGLE METRO REGION Chatham, Durham, Franklin, Granville, Harnett, Johnston, Lee, Moore, Orange, Wake

Our Partners in this Region

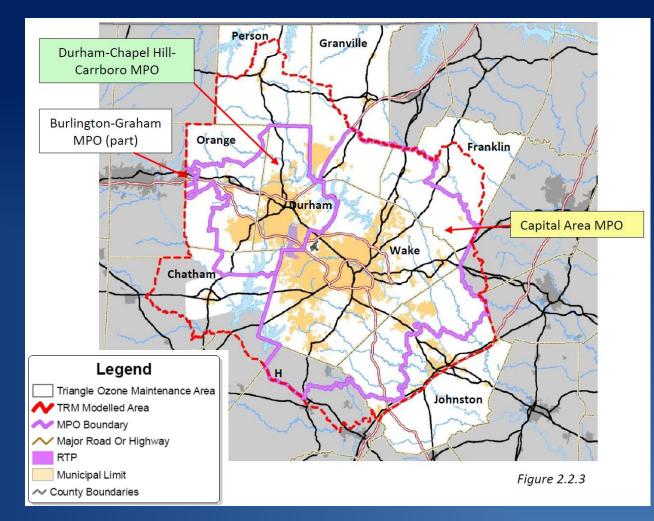

Durham-Chapel Hill-Carrboro (DCHC) MPO

- All of Durham and parts of Chatham and Orange counties

Our air quality region includes small portions of Burlington-Graham-Haw River MPO

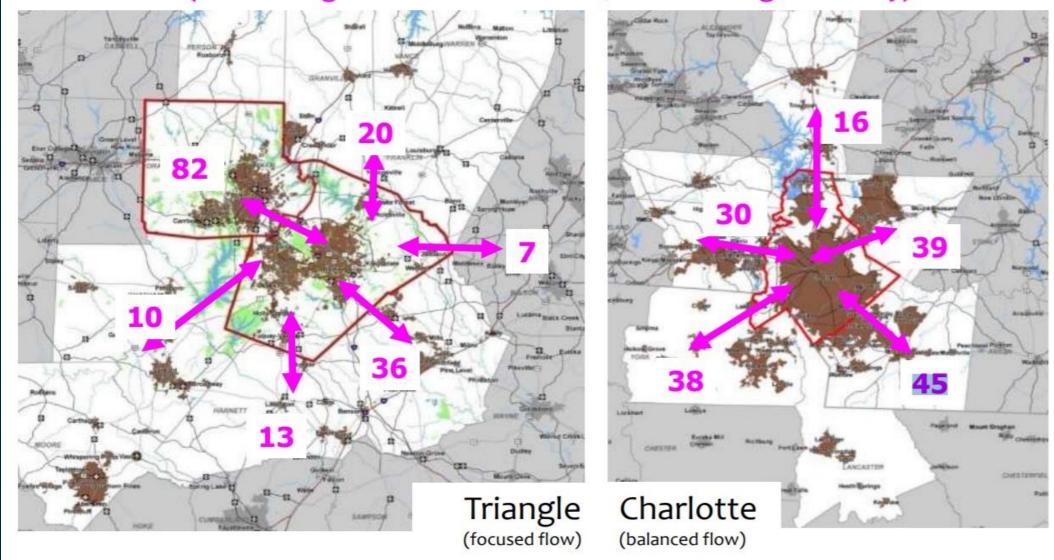

Often partner with DCHC MPO, NCDOT, TJCOG to conduct studies, plans

- MTPs
- Triangle Bikeway Implementation

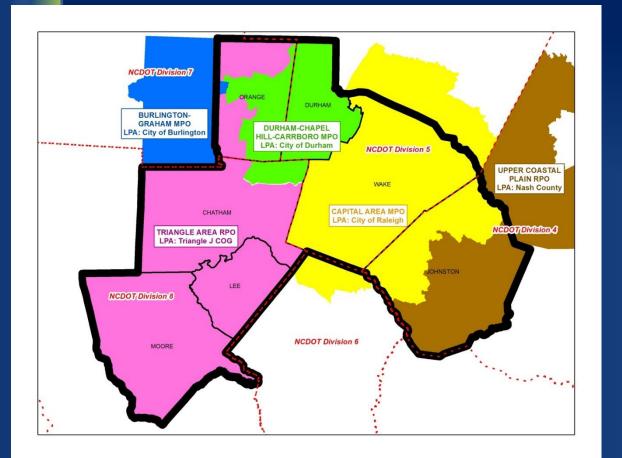

Why the "2 Sides of the Region" Plan Together

(commuting flows in thousands to/from the largest county)

2009-2013 ACS journey-to-work (Triangle), 2006-10 ACS (Charlotte)

Our Partners: TJ Council of Governments (TJCOG)

- Regional coordination
- Assist with MTP development
- Administers Regional Transportation
 Demand Management (TDM) Program
- Coordination between other regional issues (housing, land use, water quality, etc.) and transportation

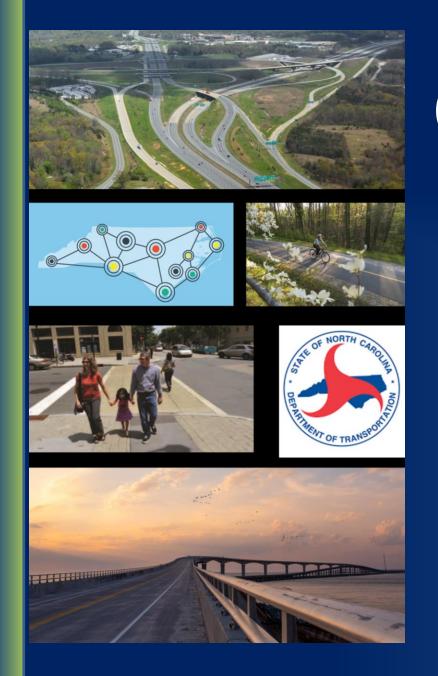

Our Partners: RPOs (Rural Transportation Planning Organizations)

- 1998 Federal law brought "rural consultation" requirement
- RPOs became active in early 2000s as non-metro counterpart to MPOs
- Work with NCDOT to plan rural transportation systems & advise on rural transportation policy

Neighboring RPOs:Kerr-TarTriangleMid-CarolinaUpper-Coastal Plain

Our Partners: NCDOT (NC Department of Transportation)

Many levels/silos:

- Transportation Planning Division (TPD)
- Local Divisions (4, 5, 6), Construction & Operations
- SPOT & Programming
- Multi-Modal Divisions (Rail, Bike/Ped)
- Project Development, Design, Environmental
- Support (GIS/Mapping, Crash, Pavement, OCR & BOWD, etc.)
- NC Tolling Authority (NCTA)

NCDOT (cont'd)

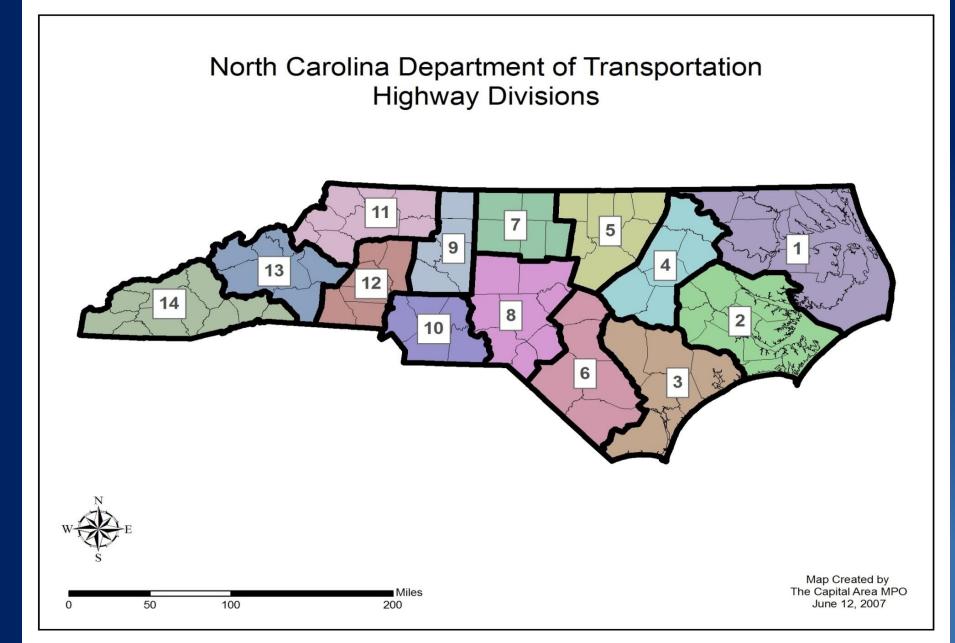

- Maintains over 80,000 miles of public roads
 - 2nd most in country, behind Texas
 - NC's counties do not maintain any roads as is frequently the case in other states.
- Divided into 14 Highway Divisions
- Distributes federal monies to MPO for transportation planning activities
- Uses MPO Planning outputs to inform and determine state transportation project decisions

NCDOT Highway Divisions

19 MPOs & 18 RPOs in NC

Metropolitan Planning Organizations, Rural Planning Organizations,

Map Created By NCDOT Transportation Planning Division July 2018

Our Partners: Federal Transit Administration (FTA)

- Public transportation ("transit") includes buses, subways, light rail, commuter rail, monorail, passenger ferry boats, trolleys, inclined railways, demand response, and people movers.
- The federal government, through the FTA, provides financial assistance to develop new transit systems and improve, maintain, and operate existing systems (Sections 5303, 5307, 5310, 5339, and 5340).
- The FTA oversees grants to state and local transit providers.

Our Partner: Federal Highway Administration (FHWA)

- FHWA funds are allocated to, and administered by, NCDOT's Transportation Planning Division and used to support transportation planning activities.
- FHWA conducts a quadrennial certification review process for all MPOs
- Provides technical assistance and project review assistance

MPO Funding for <u>Planning</u>

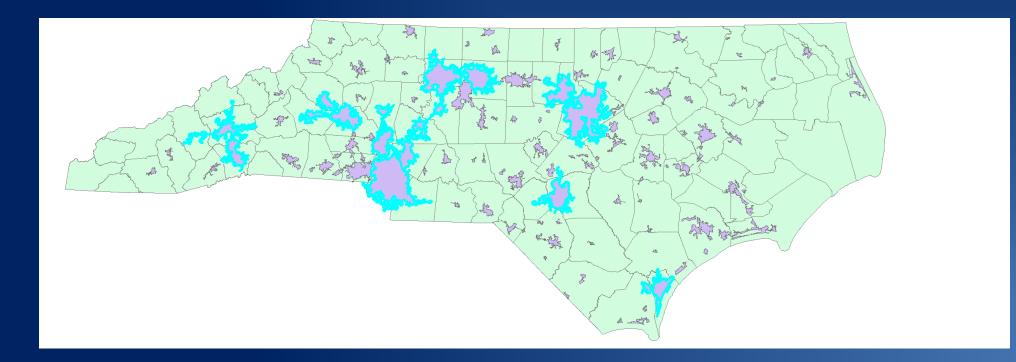

<u>PL Funds</u>	STBGP-DA Funds	<u>SPR Funds</u>
Planning funds allocated by FHWA to MPO's based on population	Surface Transportation Block Grant Program – Direct Allocation	State Planning & Research Funds
Administered by NCDOT Transportation Planning Div.	Funds supplied by US DOT to MPO's with 200,000+ population	Available through NCDOT for use on special studies or planning efforts
	Meant to cover additional planning & project requirements of larger urban areas	Typically applied to our large regional planning studies
	Programmed in UPWP and through LAPP	Application process through NCDOT Transportation Planning Division

Planning Requirements

TMAs (Transportation Management Areas)

- MPOs over 200,000 in urbanized population get access to additional funds but have greater reporting and planning responsibilities (Congestion Management Performance measures)
- Get additional federal funds for more planning and project needs

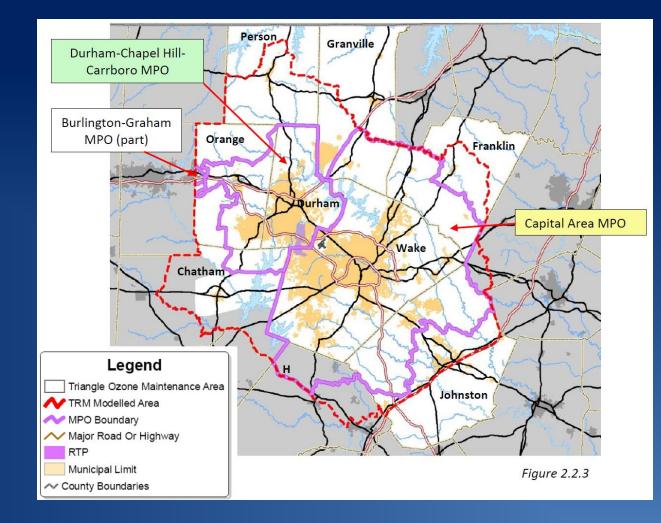

MTP & Air Quality Conformity

- Capital Area MPO and DCHC MPO first synchronized their LRTP update processes beginning in 2002.
- CAMPO and DCHC MPO adopted joint 2035 LRTP in 2009.

Winner: National Award for Outstanding Achievement in Metropolitan Transportation Planning (AMPO)

- 2045 MTP adopted February 2018
 - Air quality conformity determination report adopted January 2019
- 2050 MTP development underway

Recent Federal <u>Consultation Requirements</u>: Statewide and Metropolitan Transportation Planning

- MPOs and States shall consult (as appropriate) with "State and local agencies responsible for land use management, natural resources, environmental protection, conservation, and historic preservation" in developing long-range transportation plans.
- Requires MPOs to establish and maintain a system of performance metrics that help our region meet established regional goals and objectives as well as state targets in a variety of areas.

MAP-21: Performance Measures

- Infrastructure condition: state of good repair
- **Congestion reduction:** reduce congestion on NHS
- **Safety:** reduce fatalities and serious injuries on public roads
- System Reliability: improve efficiency of travel
- Freight Movement and Economic Vitality: improve freight networks, rural access, regional economic development
- Environmental Sustainability: protect, enhance the environment
- Project Delivery: reduce delays in development and delivery
- **TARGETS** are determined by MPOs and states

FAST Act (2015)

Fixing America's Surface Transportation Act

- Continues the MAP-21 approach of formula program funding
- Continues to require intermodal transportation planning to include bike/ped facilities, Safe Routes to Schools, recreation trails
- Increased focus on considering system resiliency/reliability, reducing storm-water impacts, and enhancing travel and tourism through planning activities
- In transit planning, MPO's must consider role of intercity buses in congestion reduction, energy consumption and pollution in a cost-effective manner
- Also must recommend strategies and investments that preserve and enhance intercity bus systems, and asset management performance targets
- Safety, Transit Asset Management, Pavement Condition and Congestion Targets adopted by CAMPO

Breaktime!

Vehicle Congestion Forecasts 2013 2045

MPO Functions, Programs & Products

MPO Products

Metropolitan Transportation Plan (CTP/MTP)

- Updated every 4 years
- Must cover 20+ years
- Revenues & Costs must balance
- CTP is unfunded element of MTP

Transportation Improvement Program (TIP)

• Updated every two years (mostly)

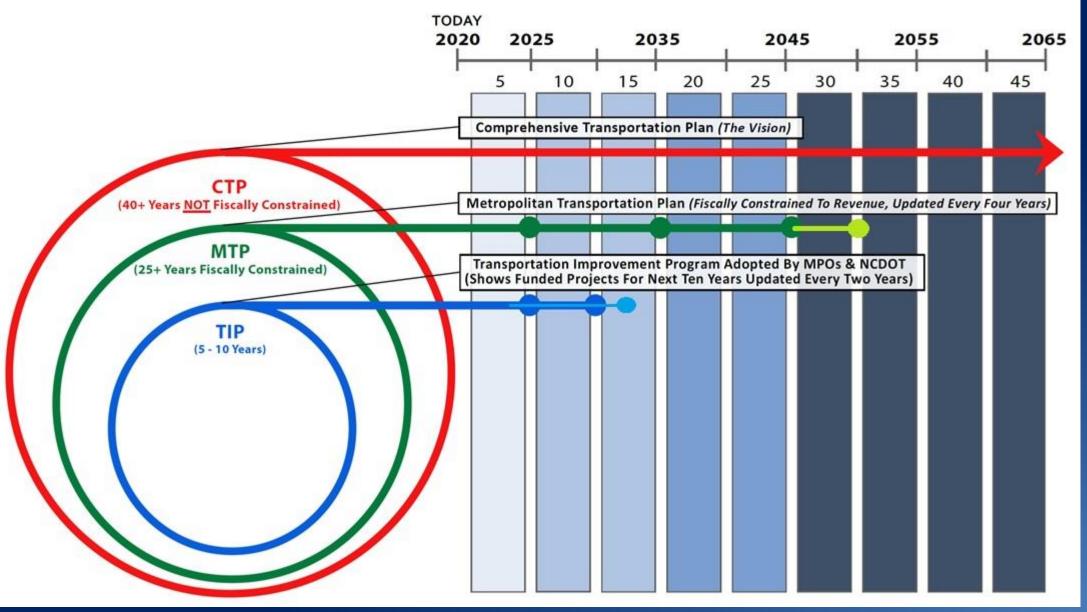

- Determines regional transportation priorities in coordination with NCDOT
- Identifies state, federal & local funding
- Must be consistent with MTP

• Updated annually

- Outlines annual planning and programming tasks for MPO staff
- Transit planning funding included
- Funded through 20% local match 80% federal funds

TRANSPORTATION PLANNING PRODUCTS

MPO Products

	Time Horizon	Contents	Update Requirements				
СТР	30-50 Years	Future Goals, Strategies & Projects (Not Fiscally Constrained)	Tied to MTP update				
MTP	20 Years (Min)	Future Goals, Strategies & Projects (Fiscally Constrained)	Every 4 years				
TIP	10 Years	Transportation Investments/Projects	Every 2 Years				
UPWP	1-Year	Planning Studies, Tasks, Budget	Annual				

Comprehensive Transportation Plan (CTP)

A Multi-modal long-range vision plan that defines an organization's philosophy towards decisions related to the integration of transportation and land use

- > Highway Plan
- Public Transit and Rail Plan
- Bicycle/Pedestrian Plan
- Depicts transportation infrastructure needed to handle the area's projected traffic for a minimum 30-50 year planning horizon – planning beyond the MTP horizon years
- CAMPO CTP = unfunded portion of our MTP

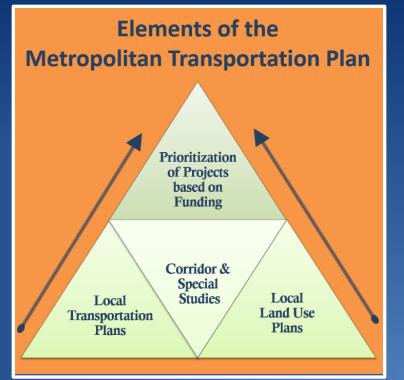

Metropolitan Transportation Plan (MTP)

- Federally Mandated
- Emphasis on preservation and efficiency improvement of existing system
- Planning horizon of at least 20 years (25 preferred)
- Updated every 4 years
- Plans for all modes of transportation
- Fiscally constrained; not a wish list
- Projects must be consistent with MTP if
 - Funded with federal funds
 - Regionally significant
- Extensive public involvement
- Our Plan
 - Joint plan with DCHC MPO (2045)
 - Adopted by Executive Board in February 2018
 - 2050 underway

MTP Development Process

Problems

MPO Planning Activities

- Large Area Studies
 - Southeast Area Study
 - Southwest Area Study
 - Northeast Area Study
- Corridor Studies
 - NC 98
 - US 1 Phase I and Phase II
 - US 64
 - NC 56
 - NC 50
 - US 401 (to begin FY 2021)

- Hot Spot Studies
 - I-40/US1/US64 Interchange
 - 50/56/15 Intersection Realignment
- Other Special Studies (rail, transit, bike/ped)
 - Bus on Shoulder System Study (to begin FY 2021)
 - Raleigh-Cary Rail Crossing (RCRX) Study
 - Rolesville Main Street Study
 - Strategic Triangle Tolling Study
 - Triangle Bikeway Implementation Study

MTP: Every four years

Example: Commuter Corridors Study

- Programmed in FY 2019 UPWP
- Technical analysis of some of the region's major commuter corridors
- Worked to forecast what the outcomes could be if certain, purposely drastic and hypothetical, improvements or adjustments were made to the region's network. Each scenario was modelled in isolation to gain a fuller understanding of what the potential impact could be.
- Will help inform which projects to prioritize, and during which decade, during the development of the 2050 MTP

CAMPO COMMUTER CORRIDORS STUDY, CAPITAL AREA MPO REGION Summary of Existing Conditions and Future Scenario Analysis

ABOUT THE STUDY

The Commuter Conidon Study was initiated in December of 2016 by the Capital Area Metropolitan Planning Organization (CAMPO), in cooperation with the North Carolina Department of Transportation (NCDOT). The purpose of the study was to understand the underlying causes of traffic congestion along major commuter corridors in the region, explore the emerging growth and mobility trends, and test hypothetical future scenarios is terms of their impacts on mobility safety, accessibility and the environment.

As can be seen in the forecast map shown on the other side, all interstates and highways in the region are projected to have some level of traffic corgetion in the future. Taffic volumes are anticipated to exceed capacity for these roadways by year 2045. This corgestion forecast is based on the region's growth projections of two million people, one million jobs, and nine million trips. These growth projections are server adopted as part of the region's 2045 Mereopolitan Transportation Pfine MTPD, These communic corridors same as the sconomic backhone of the region as they connect the City of Raleight's employment centers with the communicate communities in Wake and several neighboring Counties (i.e., Durham, Chuflann, Harnett, Johnston, Nakh, Franklin, and Gannelle ja well as the Research Transportation park (RTP). This observation led to the question: Why is these so much red in the mag despite sepreved plans' for significant

roadway and transit investments? This led to the launch of the Commuter Corridors Study.

STUDY PROCESS AND SCOPE

The study involved a consultant team from Baseline Mobility Group and Resource Systems Group, and a technical steering committee that consisted of several CAMPO member and partner agencies. The technical steering committee guided the development and analysis of future scenarios. This included a broad-based scenario plannin acronach where readitics are well as unsalicit-incontecties loarnais could be texted.

NCE MEASURES FOR FUTURE SCENARIOS

TOLL3 -123.3 🚍 🙆 😭 😭 🚱

ETOD 45.5 😪 💿 😫 🚍 🥝 🥵

MHUB -16.3 🚓 💿 🚍 🚍 🙆 🥵

POSITIVE CHANGE ONEGATIVE CHANGE ONEUTRAL/MIXED CH

97.2 😸 🙆 😫 🤮 🧐

The study area included four Interstates, seven U.S. Highways, and six N.C. highways fo a total of 17 corridors, listed below. • Interstates: I-40, I-440, I-87, I-540

• U.S. Highways: US 1, US 1 Alt., US 64 Bus, US 70, US 70 Bus, US 401

NC Highways: NC 55, NC 55 Bypass, NC 540, NC 50, NC 54, and NC 98

A total of six scenarios were developed and analyzed by the consultant team using a combination of land use, travel demand and benefit-cost analysis models². All six scenarios were developed by pivoting from the socio-economic projections that are embedded in the 2045 MTP.

Statewide Transportation Improvement Program (STIP); 2045 Metropolitan Transportation Improvement Program (MTF The land use model used in the study is the region's Community/Vz model, the toxed demand model used is the Transel Recommend Model (TRM), and the benefit over model used in the FMPAB Benefit Cast Analysis (SLAT Tool.

FUTURE LAND USE-TRANSPORTATION SCENARIOS

The six "hypothetical" future scenarios modeled and analyzed in the study are summarised below. These is scenarios ware measured using a host of traffic consistion measures such as level of traffic saturation, travel speed, travel time reliability, and modal split between Single-Occupant Vehicle (SOV), Carpeol, Bux, Rail, Walking and Biking. These scenarios were also analyzed using benefit cost measures to understand the net economic, codal and environmental banefit of a scenario – see the table. More detailed information for each scenario is available at www.campen.cut; scarch" formuter corriforat".

HWYX – Highway Mega Expansion: This scenario hypothetically assumed doubling of the number of General-Purpose lanes along congested commuter corridor segments in the CAMPO region including 140, 1440, 1540, US 1, US 64, US 70, and US 401. OUTCOME: This control may determed jumshifts and infeasible for the huma costs and

community impacts, so it was excluded from the list of final scenarios modeled.

TOLL3 – Conjestion Priling – Oynamic Tolling: This scenario was intended to capture the emerging three of applying tols to save traffic competition in usan area. The thurdy assumed dynamic prixing, meaning the prior fluctuater in real-time, during pask periods slowg the region's fineway contriders. It was also assumed that the pask tell princing is only applicable to Single Occupant/Whickes (SOW) and trucks, but not to High-Occupanty Whickes (HOVW) and buses. -OUTCOME: This scenario was determed feasible for some contridors such as 1-40 and 15-40 andres we looked at tolling on managed at tolling all lanes of travel due to right-of-way restrictions and community impacts.

ETOD – Equitable Transit-Oriented Development: This scenario is a transit-emphasis scenario. It was assumed that more of the anticipated future growth can be redirected toward

station areas tribuigh supportive zoning poncies and other incentives. In eliupy assumed 30 percent additional growth in affordable multi-family, office and retail uses within half-mile of each planned transit station in the region, and 100 percent increase in transit frequency for future transit routes in the region.

OUTCOME: This scenario was deemed realistic and feasible, and has the potential to curb future traffic congestion in the region.

RESY - Regional Resiliency: This scenario was intended to illustrate the importance of resiliency planning for traffic daruptions due to extreme weather events. The study assumed 50 percent reduction in the number of available lanes at several commuter corridor segments that were deemed to be vulnerable to flooding in an extreme weather event.

OUTCOME: This scenario was deemed necessary for resiliency planning. Potential negative impacts could worsen if adequate roadway connectivity is not built into the commuter comidors

CIG – Cig Economy of Mobile Workers: This scenario was intended to capture the emenging socio-economic trend where an increasing number of people work from home due to the growth of mobile (balecommuting), part-time, and independent workers. Guided by national estimates, the study assumed 25 percent reduction in work-related commute trips for mediumincome and high-income households.

OUTCOME: This scenario was deemed realistic based on current trend. It has the potential to curb freeway traffic congestion during regular commuting hours, but may cause negative impacts to off peak travel conditions or on local atterials.

MHUB – Smart Mohility Hubs: This scenario was interded to capture the new mobility trend o singi shared only services for first miles and last other line). The starty/default of 13 future mixed use center locations around the edges of the region as hypothetical future smart mobility hubs. This scenario also assumed 50 pertent additional growth in household, office and retail uses within one and one half-mile band of each of the identified mobility hubs, along with high frequency permism transit service adving commuting hours to connect each mobility hub with domition Relief and the Research Triange Park (RTP, P.

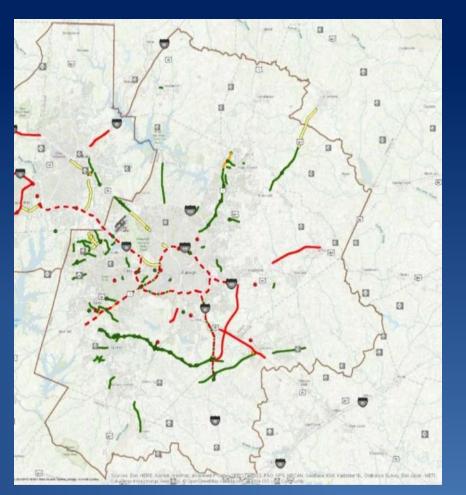

OUTCOME: This scenario was deemed realistic and feasible based on current trends, and has the potential to curb future traffic congestion in the region.

Transportation Improvement Program (TIP)

- Allocates limited resources to region's priorities
 - Similar to a Capital Improvement Program (CIP)
- Financially-constrained
 - Includes most immediate MTP-based projects and strategies for implementation
- Year-by-year "line-item" list of projects approved for federal funding
- 10-year document
 - First 5 years considered committed projects
 - Updated every 2 years
- TIP and Statewide TIP (STIP) must match
- Conforms with SIP (if necessary)
- 2020-2029 TIP in effect now
- 2023-2032 TIP under development now

Map of MTP and TIP projects: https://www.campo-nc.us/mapsdata

Unified Planning Work Program (UPWP)

- Serves as both the annual budget and the guide to work tasks for the MPO staff
- UPWP Core Mission Work Tasks:
 - Develop and maintain required transportation planning documents such as the CTP/MTP and TIP
 - Assist with the effective disbursement of LAPP program
- UPWP Non-Core Mission Work Tasks:
 - Partnering with local or state member agencies to advance transportation planning efforts in a particular area or corridor
 - Generally require additional local match from beneficiary member jurisdictions and/or other partner agencies/organizations

UPWP FY 2021

Continue Core Programs

- LAPP
- TIP
- MTP
- Travel Demand Model
- Public Engagement
- Wake Transit Program

Special Studies Continuing from 2020

- Triangle Bikeway Implementation Study
- Northeast Area Study Update
- Wake Transit
 - Web Visualization Interface
 - Wake Transit Vision Plan Update

New Special Studies

- Fayetteville-Raleigh Passenger Rail Feasibility
 Study Phase II (partner w/ FAMPO + NCDOT)
- US 401 Corridor Study
- Western Wake Traffic Signal System Integration
- Triangle Bus on Shoulder System Study (partner w/ DCHC and NCDOT and GoTriangle)
- Land Use Transportation Development
 Evaluation
- Begin work on CAMPO Strategic Plan Update

Unified Planning Work Program FY 2021 (cont'd)

Budget

- \$0.60 / capita Member Share
- Includes partnerships with DCHC MPO, Fayetteville MPO, GoTriangle, NCDOT
- Includes Wake Transit funding assumed
- Overhead for Lead Planning Agency est. \$225,000

MPO Self-Certification

- Questionnaire in Appendix C
- Outlines how the MPO conforms to federal guidelines and requirements

Other MPO Programs

- Travel Demand Modeling
- Transportation Demand Management
- Vision Zero
- Safe Routes to Schools
- Congestion Management Process
- Council of Planning US 1 Corridor
- MPO Public Participation Plan

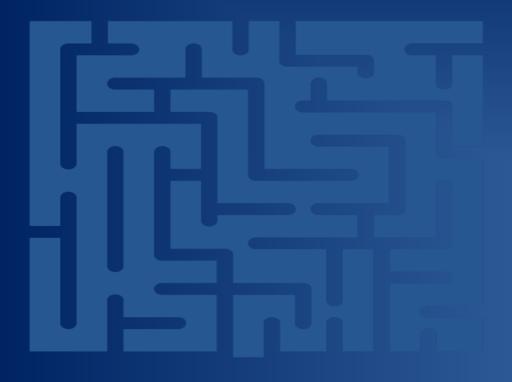

Outside Funding Mechanisms

- Statewide Prioritization (SPOT)
 - State & Federal funding through NCDOT
- Locally Administered Projects Program (LAPP)
 Federal funding available for the CAMPO region

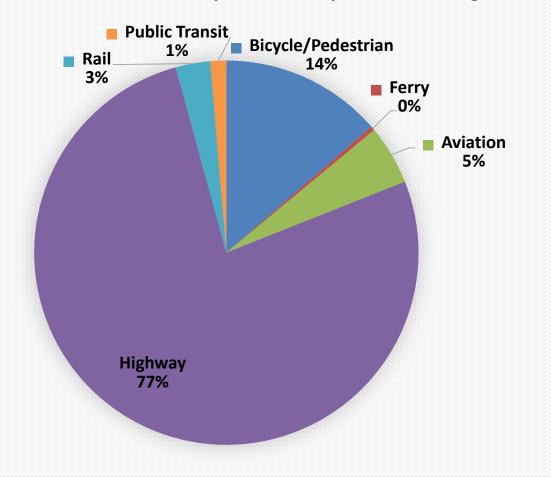

Statewide Prioritization (SPOT) & Statewide Transportation Improvement (STIP) Processes

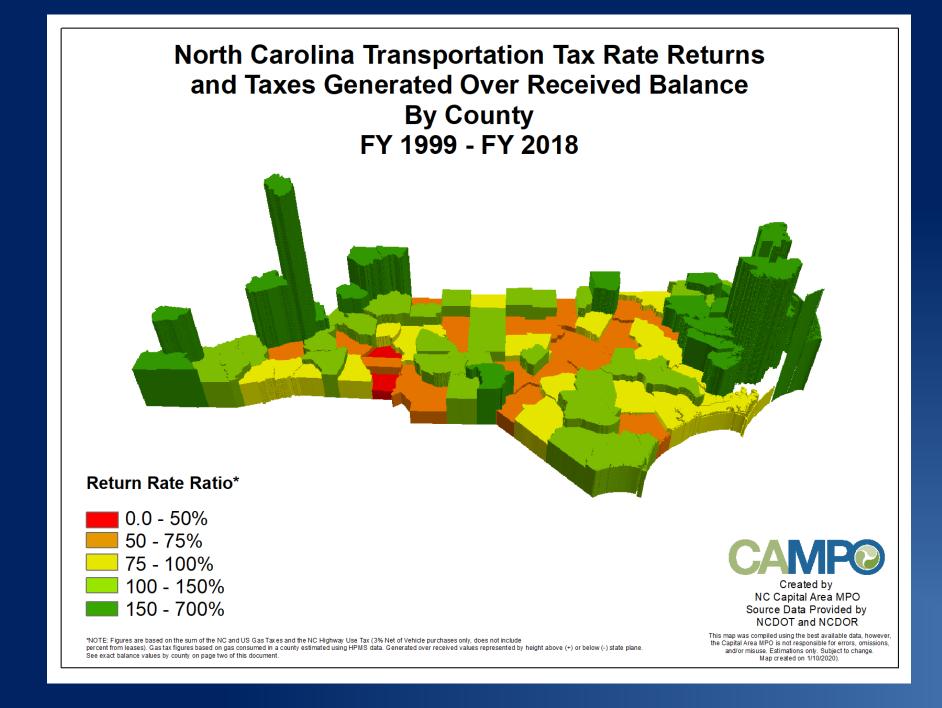

NCDOT STIP 2020-2029 Modal Breakdown (Percentage of 1,718 Projects)

FY2020-2029 Statewide Transportation Improvement Program

Evolution of SPOT Prioritization Processes

- Prioritization 1.0 began in 2009
- Over time, updated processes and built on successes
 - Added data methods for non-highway modes
 - Expanded criteria based on stakeholder input
- Strategic Transportation Investment (STI) Law around Prioritization 3.0
- Recently Completed Prioritization 5.0 Process (current TIP/STIP)
- SPOT 6.0 Process Underway

SPOT

- Quantitative, needs-based approach to identifying statewide transportation needs.
- First step towards developing a fiscally constrained State Transportation Improvement Program (STIP) and NCDOT's 5/10 year Work Programs.
- Each MPO submits candidate projects for consideration in the STIP.
- Projects are scored by NCDOT and each MPO is asked to assign priority points to projects in the region.

https://www.ncdot.gov/ strategictransportationinvestments

Prioritization 6.0 & STI

STI Prioritization and Programming Process

How STI Works

40% of Funds	30% of Funds	30% of Funds			
Statewide Mobility	Estimated \$20B in	Funds for SFY 2018-2027			
Focus → Address Significant Congestion	Regional Impact				
 and Bottlenecks Selection based on 100% Data Projects Programmed prior to Local Input Ranking 	Focus → Improve Connectivity within Regions • Selection based on 70% Data & 30% Local Input • Funding based on population within Region (7)	Division Needs Focus → Address Local Needs • Selection based on 50% Data & 50% Local Input • Funding based on equal share for each Division (14 = ~\$42M / yr			

2023-2032 TIP/STIP Development SPOT Actions - MPOs

- 1. Select Projects to Submit for Scoring (44 projects per mode)
- 2. Assign Local Input points
 - Regional Impact Points (2500 pts)
 - Division Needs Points (2500 pts)
- 3. Adopt TIP

CAMPO SPOT Process Action 1: Project Selection

- CAMPO can submit 44 additional projects per mode
- Project selection based on adopted methodology Example (Roadway)
 - Initial List Creation:
 - STIP-funded projects prior to 2018 and
 - Existing SPOT database projects
 - MTP projects (SPOT requirement)
 - Delay, Travel Time, Socio-Economic growth trend metrics used as basis for comparing projects
 - A. E+C Delay/Lane Mile
 - B. 1st Decade Delay/Lane Mile
 - C. 2nd Decade Delay/Lane Mile
 - D. Network Connectivity
 - E. Interchanges/Operational Improvements
 - F. ITS Projects
- Coordination w/ NCDOT to ensure maximum submittal of CAMPO projects.

Database Projects

Pre-FY2018 STIP Projects

Remaining MTP Projects

Action 1: Next Steps

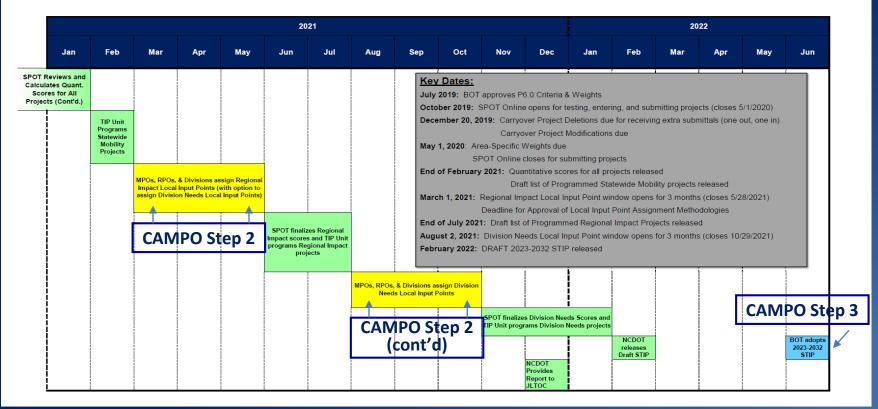

- February TCC / Executive Board Approve Project Lists for Public Review
- Project List adjustments Feb / April
- Executive Board Public Hearing & Project List Approval April 15th
- CAMPO Submits Projects in SPOT Online by May 1st
- Alternate Criteria Weights due May 1st

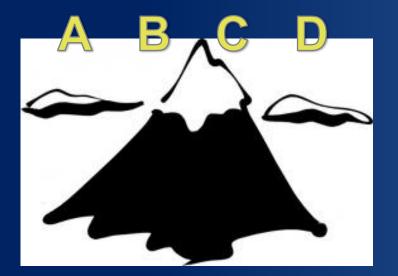

Schedule Update

FINAL Prioritization 6.0 Schedule

2019						2020

		OT Work T															NCDOT Provides Report to
				-					1		1		1		1		JLTOC

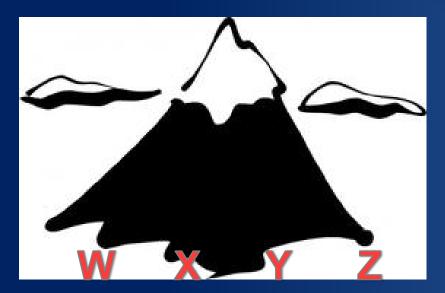

- Maximizing Funding Potential
 - "Wasted Effort"
 - Some of our projects score so well quantitatively, they do not need any additional local points

While very important to the region, putting our limited, local points here would not significantly improve their chances for funding

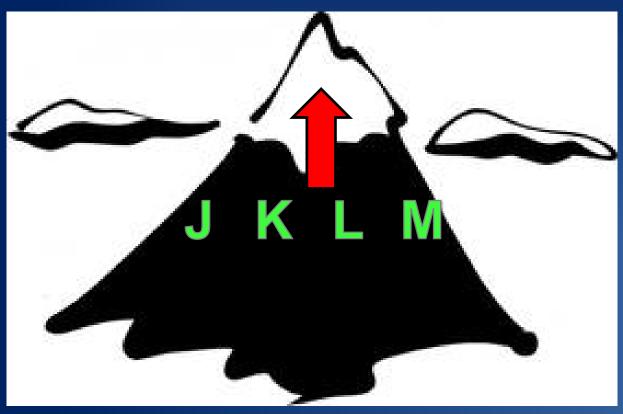

- Maximizing Funding Potential
 - "Wasted Effort" (Part 2)
 - Some of our projects score poorly, and even the maximum number of local points would not make them competitive

While important to the region, these projects are not competitive in this process

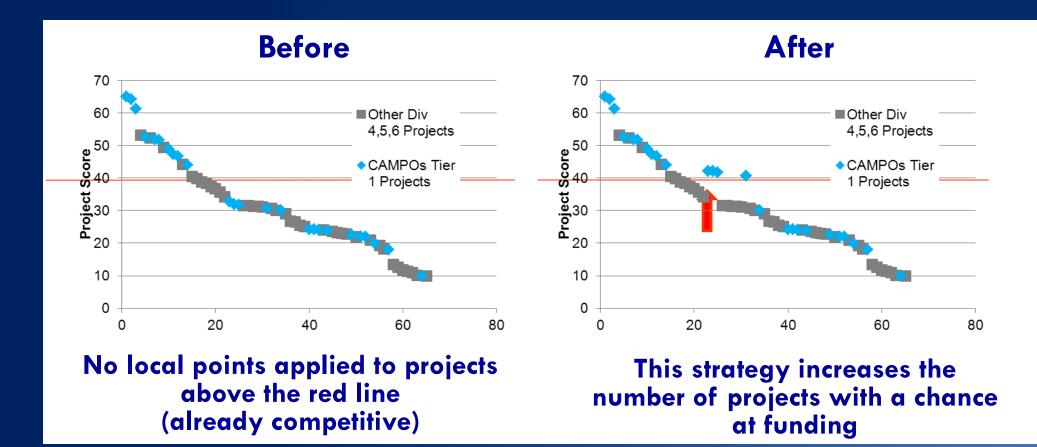

- Maximizing Funding Potential
 - Assign points to bring projects from the middle of the pack to the top

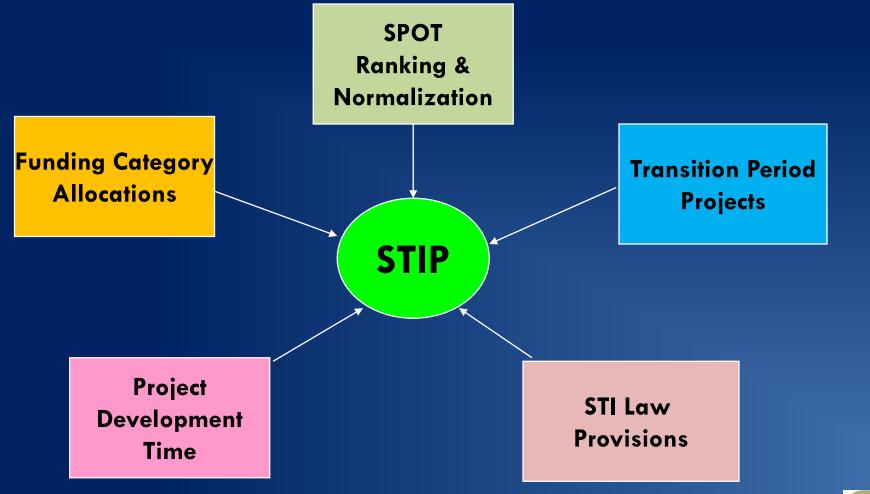

- Maximizing Funding Potential
 - Example: Regional Projects

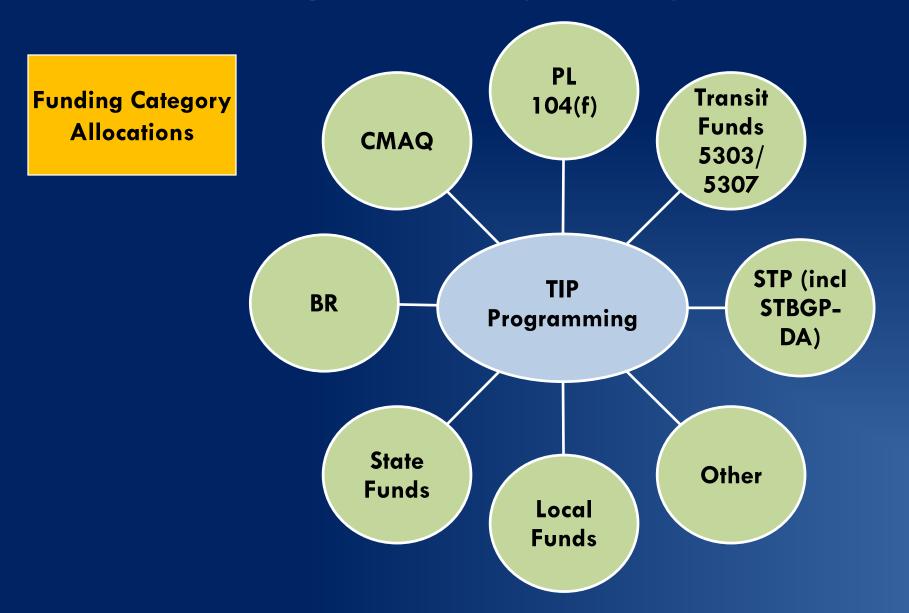

Prioritization to Programming

Division & Funding Region Map

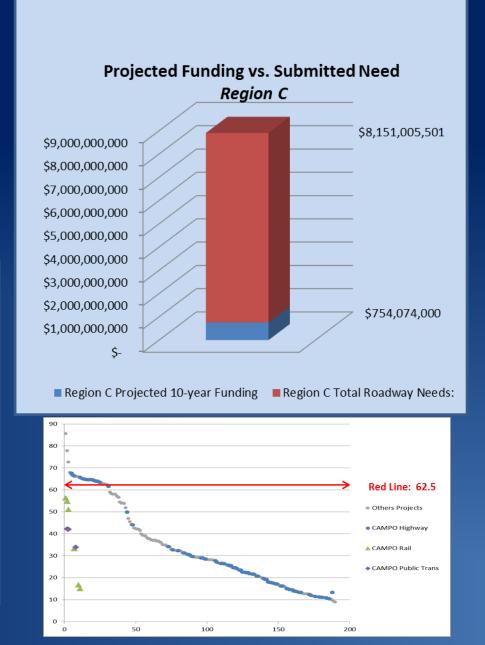

STI – Region C

Projected 10-yr Funding:	\$754,074,000
Roadway Projects:	190
CAMPO Projects:	79
Potentially Competitive Pr	ojects: 21

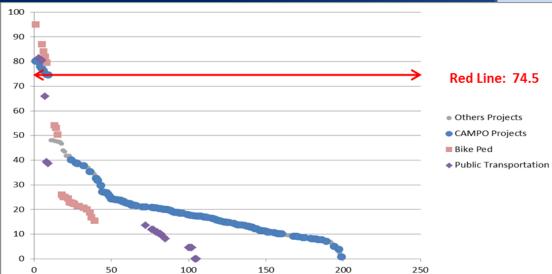

STI – Division 5

Projected 10-yr Funding:	\$102,258,000
Roadway Projects:	177
CAMPO Projects:	99
Potentially Competitive Pr	ojects: 9

Division 5 Total Roadway Project Costs:Division 5 Projected 10-year Funding

STIP/TIP 2020-2029

Highlights

- BRT (Morrisville to Clayton)
- Managed Motorways
- Complete 540

https://www.ncdot.gov/projects/Pages/ projects-temporarily-suspended.aspx

Projects Delayed

- NCDOT suspended preliminary engineering work on many projects, effective 8/30/2019
 - Preliminary engineering includes efforts to plan and design projects before construction can begin.
- Does not apply to the schedule of any projects that are
 - Currently underway,
 - Have already been awarded but have not started construction,
 - Are scheduled to start construction before August 2020, or
 - That are funded by GARVEE bonds, BUILD NC bonds or Turnpike Bonds.

Locally Administered Projects Program (LAPP)

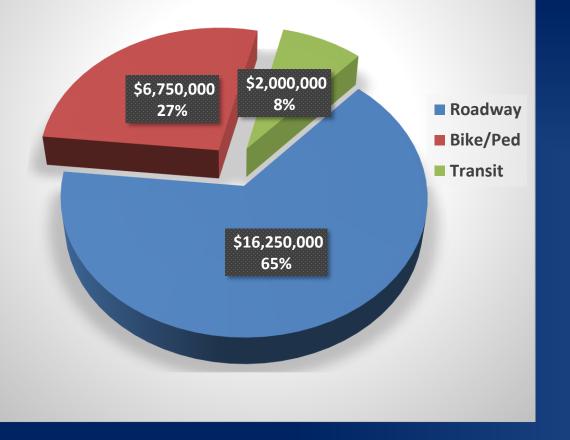

- TMAs (MPO's with 200,000+ population) get directly designated Federal funding (STP-DA, TAP-DA)
- Created in 2011 to give CAMPO a technically sound, equitable method of project funding
- Holistic approach to identifying and prioritizing small but highly effective projects
- Avoid future Federal rescissions to maximum extent possible

LAPP FFY2021 Target Modal Investment Mix

LAPP

- Staff works with the LAPP Selection Committee to
 - Maintain a project prioritization system and schedule
 - Evaluate annual submissions and recommend projects
 - Establish annual guide for modal investment mix
- Quantitative based scoring criteria by mode, only scored within mode
- Projects ranked based on:
 - Local priority
 - MTP compliance
 - Prior agency funding level
 - Project effectiveness
 - Cost effectiveness

FFY 2021 - Locally Administered Projects Program

* Executive Board approval 2/19/2020

FFY2021 LAPP Investment Mix ■ Target ■ Recommended \$20,000,000 \$18,000,000 \$16,000,000 \$14,000,000 \$12,000,000 \$10,000,000 \$8,000,000 \$6,000,000 \$4,000,000 \$2,000,000 \$0 Roadway Bike/Ped Transit

LAPP KEY DATES				
Spring	LAPP Committee recommends technical criteria and target modal mix			
Summer	Executive Board reviews criteria and modal mix, and opens comment period			
August	LAPP Call for Projects Opens			
October	LAPP Call for Projects Closes			
November – December	Projects reviewed and scored by staff and Selection Committee			
January/February	Executive Board considers recommended list for approval

A COMMUNITY INVESTMENT IN TRANSIT

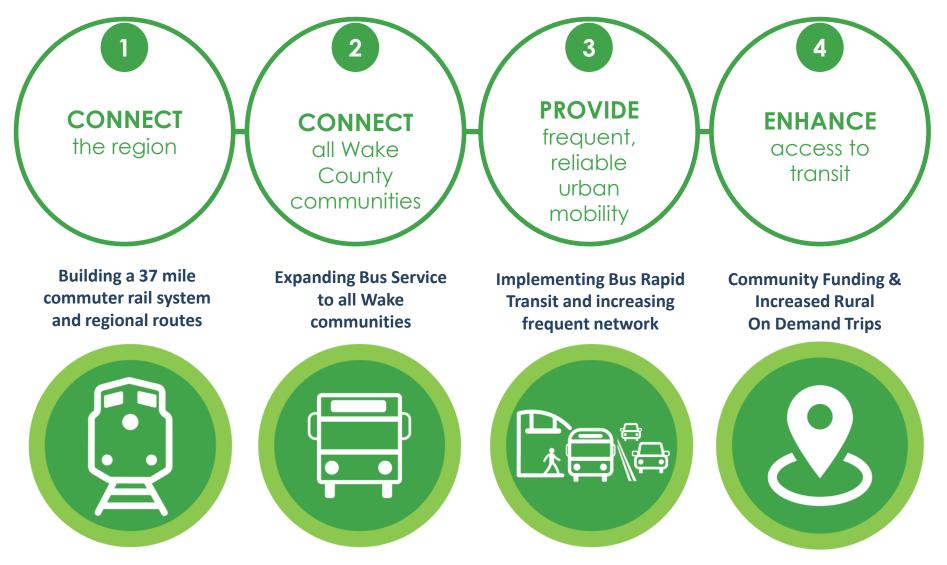

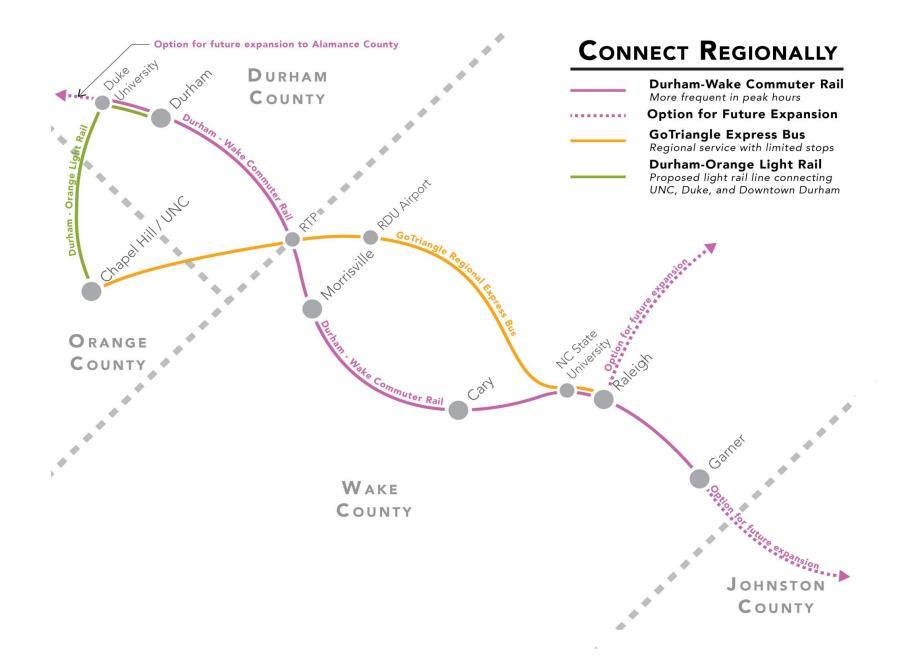

Wake Transit Overview

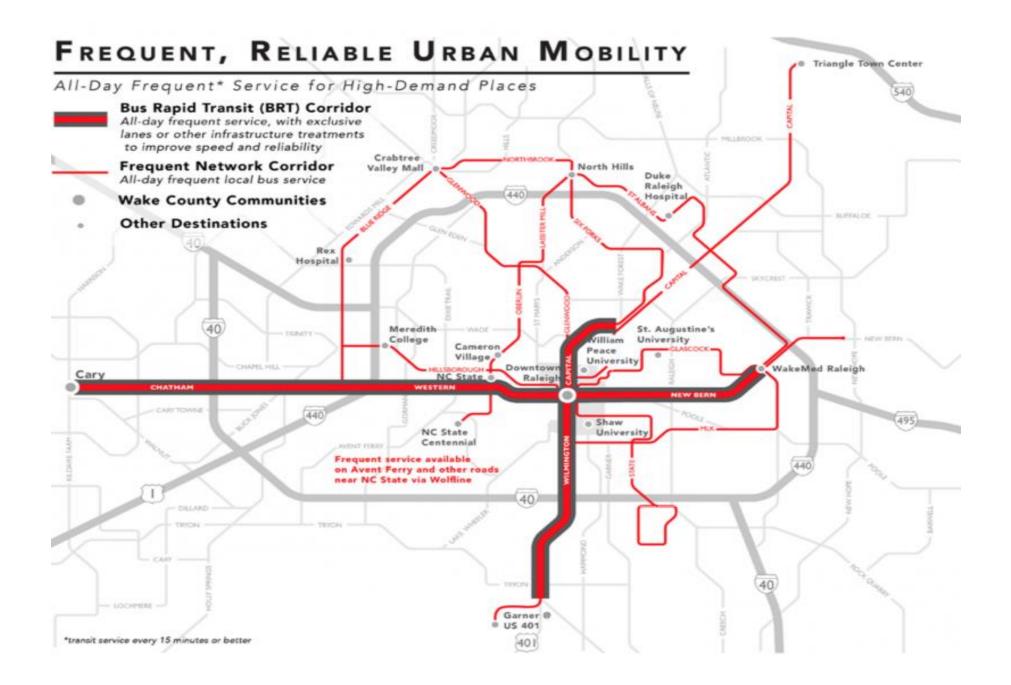

Transit Plan Elements Funding Sources Governance Structure CAMPO's Role Local Involvement

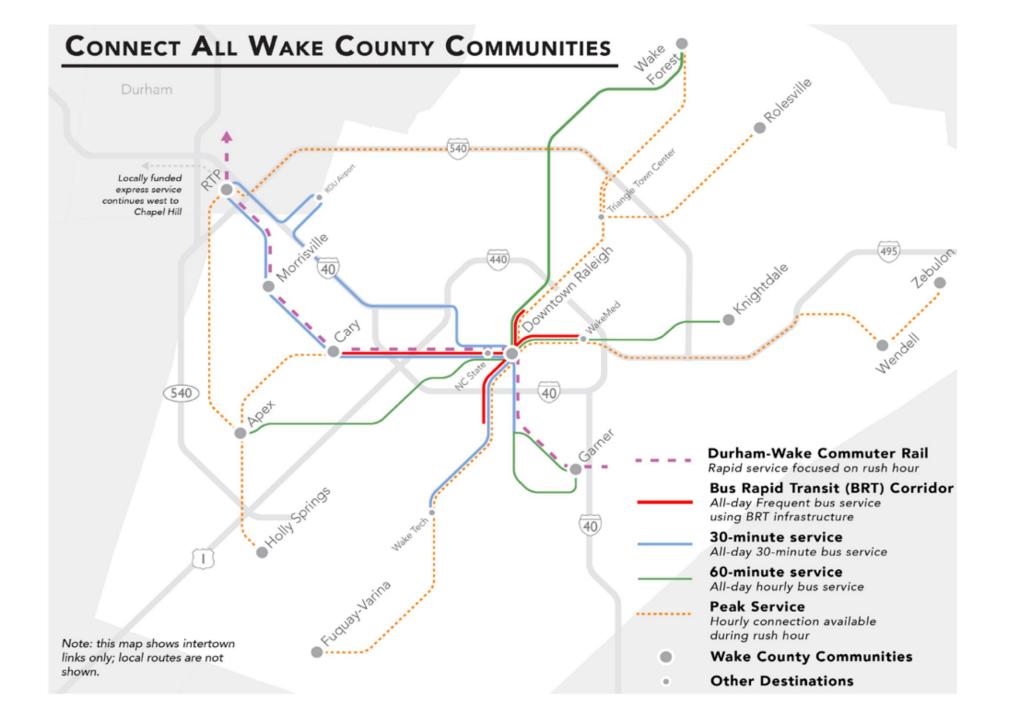

Wake Transit Plan: Four Big Moves

In November 2016, Wake County voters approved a transit-dedicated half-cent sales tax investment.

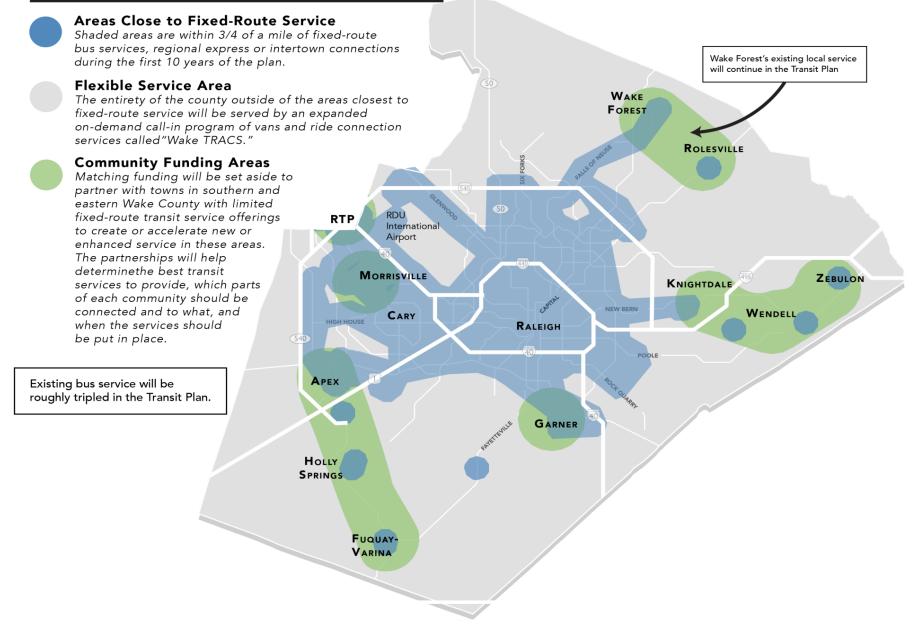

ENHANCED ACCESS TO TRANSIT

Wake Transit Funding Sources

The Wake Transit Plan is moving through implementation

We are in the third year of a 10-year plan

Funding Sources

1/2 cent sales tax*

\$7 County vehicle registration fee

\$3 increase to regional vehicle registration*

State & Federal support for new services

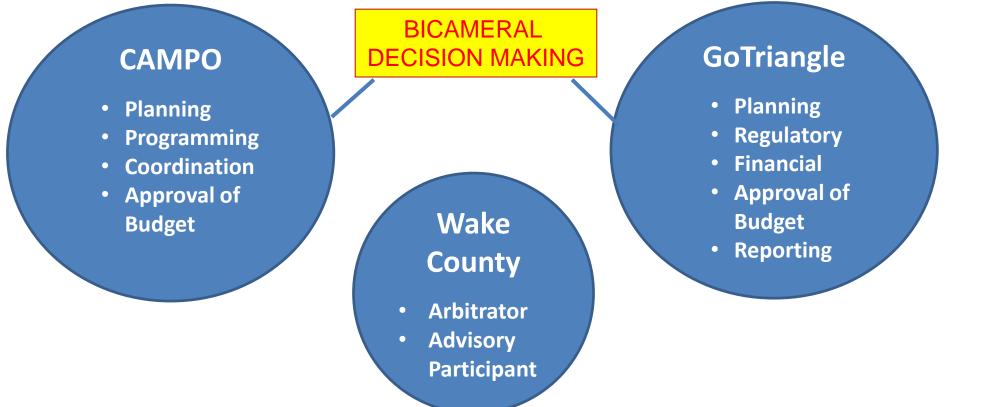

*State legislation requires proceeds supplement and not replace existing funds allocated for public transportation systems.

FY 2021 Revenue Source	Amount
Half-Cent Local Option Sales Tax	\$99.3 million
Vehicle Rental Tax	\$4.5 million
\$7 Vehicle Registration Tax	\$6.8 million
\$3 Vehicle Registration Tax	\$2.9 million
Other (Federal, State, Fares, Debt Proceeds, Transit Provider Contributions, Allocation from Capital Fund Balance)	\$36.8 million
TOTAL	\$150.3 million

Interlocal Governance Agreement

Considered the Wake Transit Implementation Constitution

Parties and Their Respective Roles

WAKE COUNTY

Interlocal Governance Agreement

If necessary, Conference Committee to reconcile differences in Board decisions

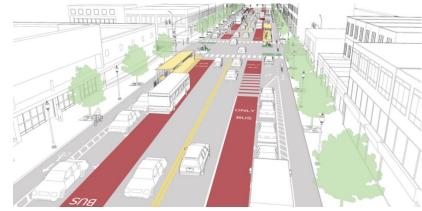

Wake County Transit Planning Advisory Committee (TPAC)

22 member staff-level technical committee

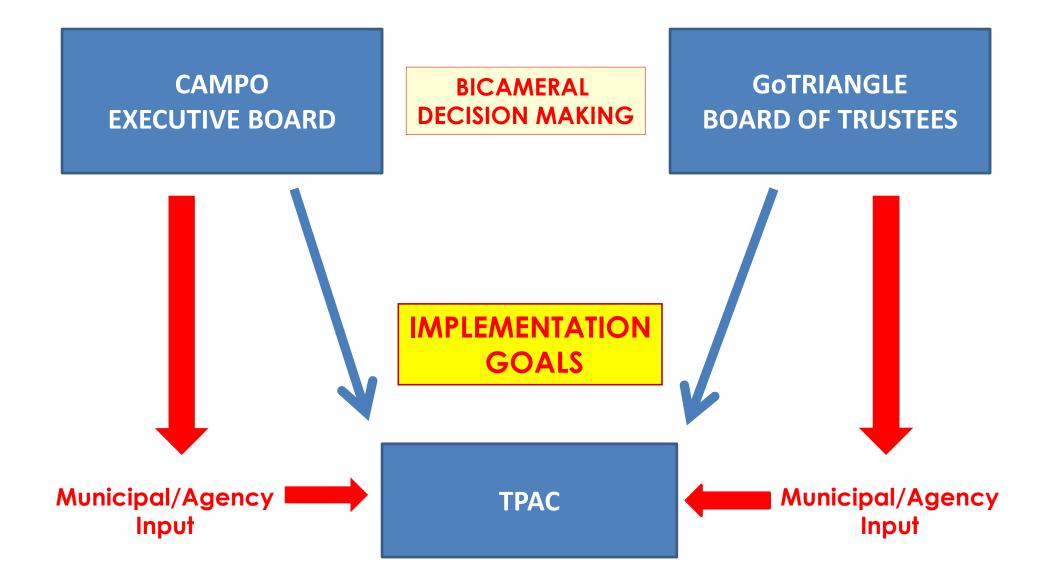

- Similar to CAMPO TCC
- Created by Governance ILA among CAMPO, Wake County, GoTriangle
- Recommends technical implementation details to governing boards
- Serves a mostly programmatic implementation role
- Intends to standardize and augment existing but disconnected decisionmaking structures for use of specific funding sources
- Annual Work Plan including budgets, mid-range project programming, financial model updates
- 4 sub-committees

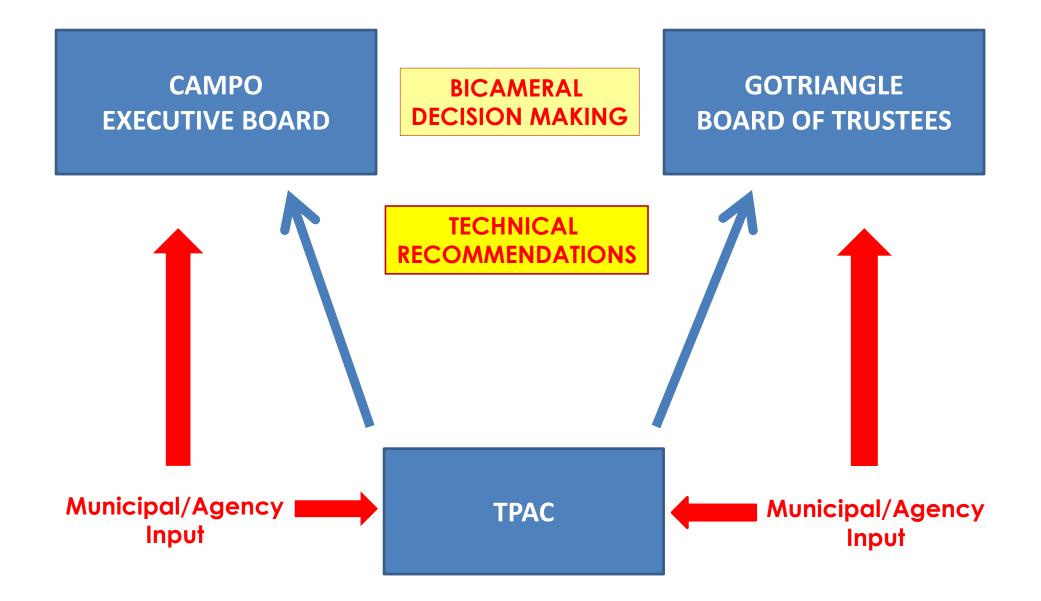

Staffed by CAMPO

WAKE COUNTY

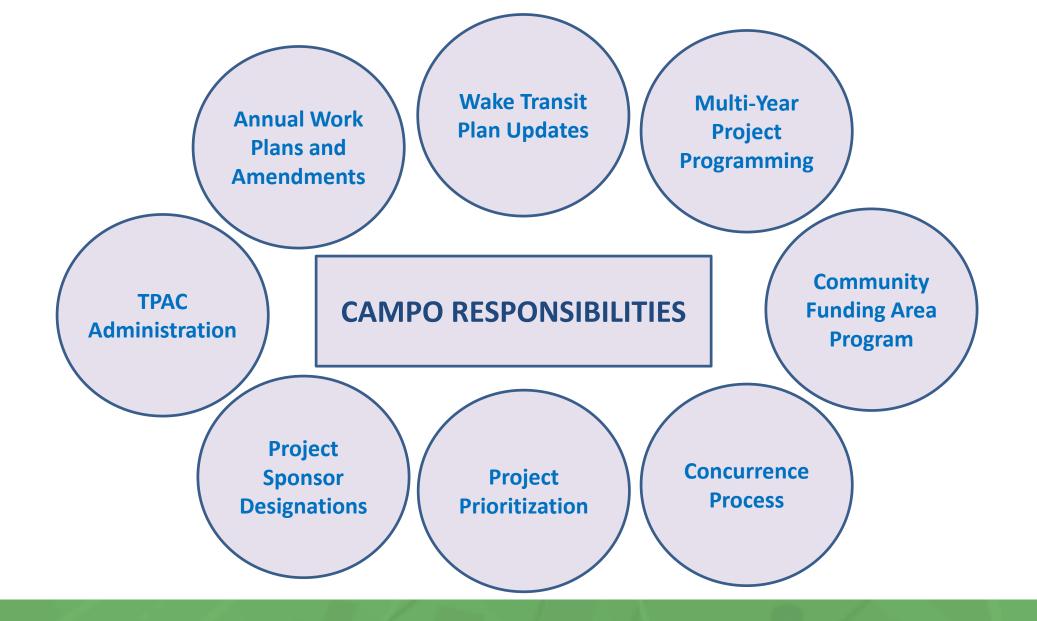

Interlocal Governance Agreement

Requires Annual Work Plan and Deliverables that Inform Annual Work Plans

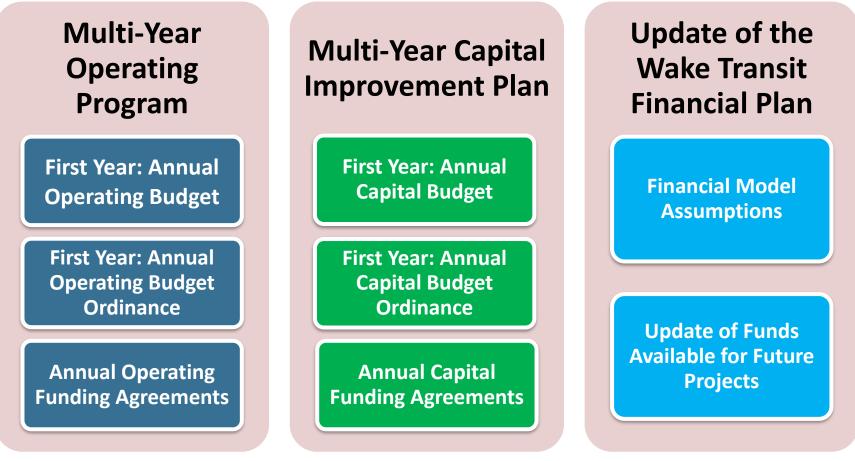

WAKE COUNTY

Annual Wake Transit Work Plan

Considered/Adopted by CAMPO and GoTriangle Boards Annually

Annual Work Plan Development Process

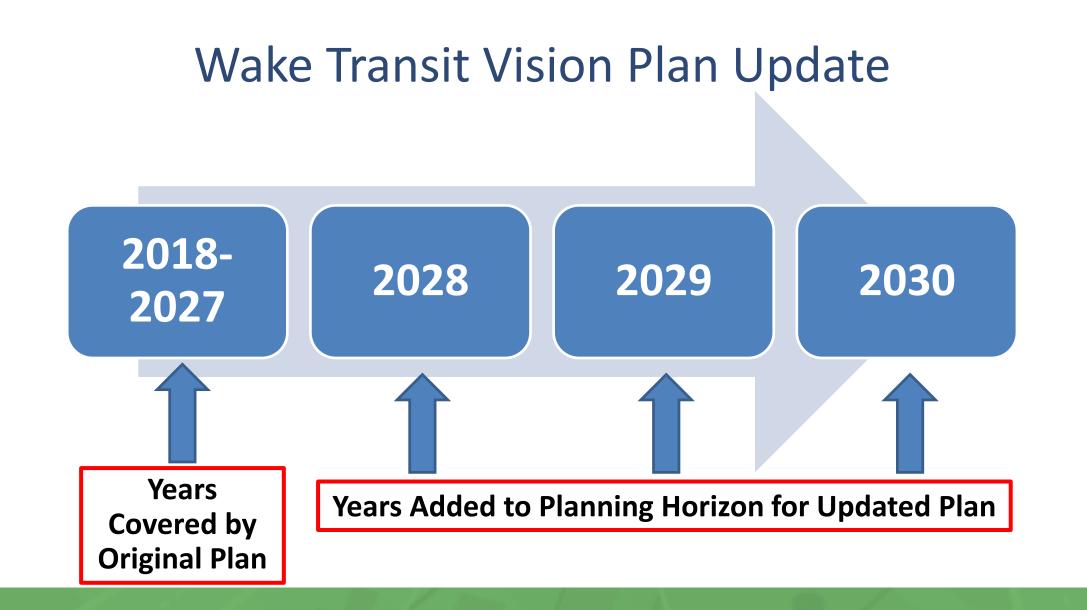

Project Funding Requests From Project Sponsors (September/October)

Draft Work Plan Produced by Lead Agencies in Coordination with TPAC (January)

Agency and Public Comment on Draft Work Plan (January-March)

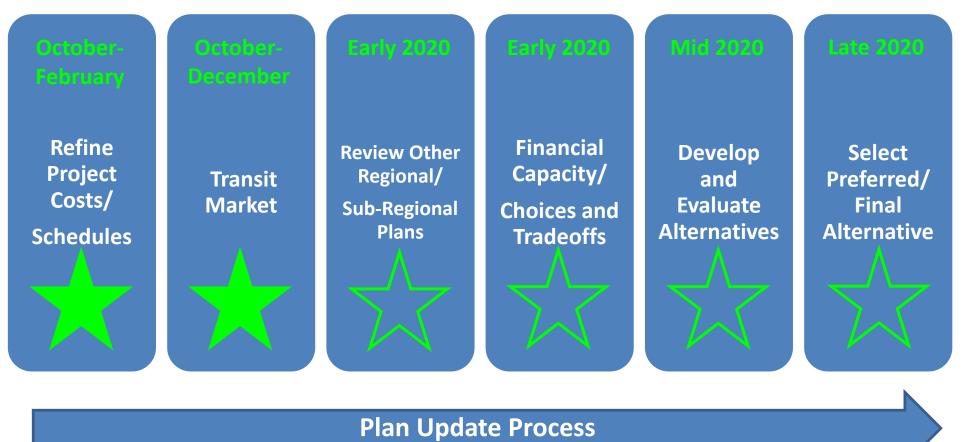

TPAC Members Coordinate with Internal Budget Development Processes (January - April)

TPAC Recommends Final Work Plan (April/May)

GO FORWARD A COMMUNITY INVESTMENT IN TRANSIT

Vision Plan Update Steps

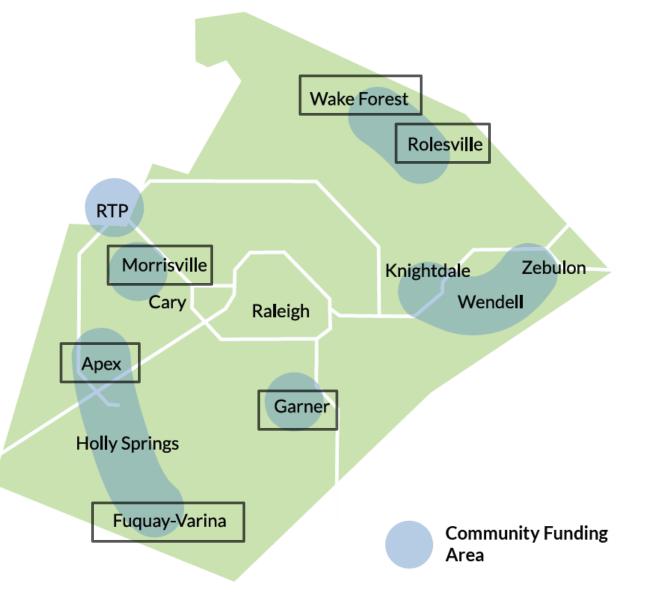

Community Funding Area Program - Funded Projects

Planning

Town of Apex (FY19) Town of Morrisville (FY19) Town of Garner (FY20) Town of Fuquay-Varina (FY20) Town of Rolesville (FY20)

Operating

Town of Wake Forest (FY20)

Your Role in the Wake Transit Planning Process

All:

- TPAC and Governing Boards
- Specialized Committees for Plans/Studies that Inform Annual Work Plan

Traditional Transit Providers:

- Internal Prioritization of Projects/Budget Development
 - Based on priority recommendations in plans/studies and response to community demands
- Internal Service Design, Development/Refinement of Technical Specifications, Project-Level Public Engagement

Other Municipalities/Agencies:

- Community Funding Area Service Planning
- Participation in Development of Regional Services

Ideas to Reality

Ideas to Reality

CAMPO = Regional Transportation Planning

All Transportation Projects must comply with federal and state project development regulations

NEPA: Projects using federal funding must comply with the National Environmental Policy Act to ensure the least environmentally damaging alternative (natural or cultural) is developed.

Ideas to Reality

Small Projects (< \$10 million)

Smaller projects (operational/safety improvements) can be implemented relatively quickly through LAPP with a local match, or through the TIP.

MTP Action?

Smaller projects can generally be included as operational improvements and do not require separate MTP action. Adding capacity may require MTP action.

TIP/STIP

Safety and operational improvement projects are generally included in the Transportation Improvement Program and the Statewide TIP. LAPP projects are not subject to statewide prioritization (SPOT) to be programmed in the TIP/STIP.

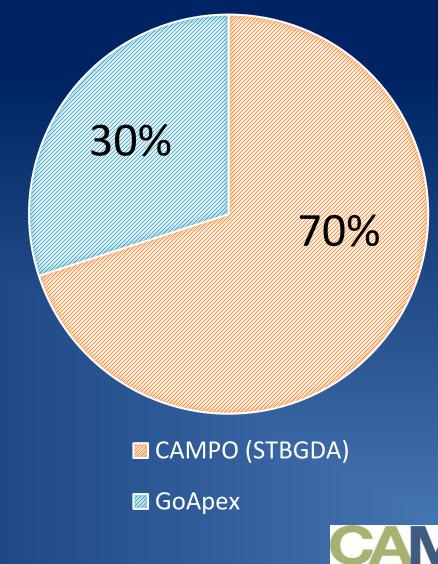

Ideas to Reality – Small Projects

GoApex Route 1 Bus Stop Improvements

Construct bus stops along Town of Apex's first local bus route

Coordination –

Town staff utilized Wake Transit Community Funding Area funds to plan a circulator route within Town. The following year, Town applied for LAPP funding to purchase and install bus stops to support the new route.

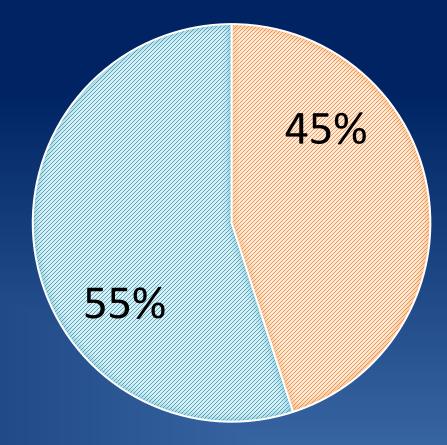

Ideas to Reality – Small Projects

White Oak Greenway (MacArthur Section)

Construct missing link in White Oak Greenway at MacArthur Drive in Cary

 Project is the final link in White Oak Greenway and serves as a portion of East Coast Greenway.

CAMPO (CMAQ) Cary

Ideas to Reality – Small Projects

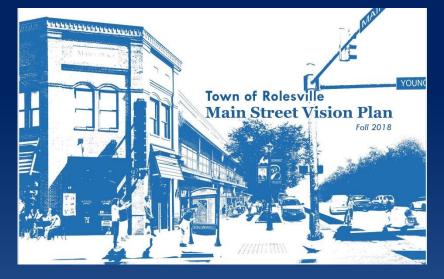

1) Rolesville Main Street Vision Plan

- Planning Study in the FY2018 UPWP

2) Rolesville LAPP Projects

Two Projects Awarded in FFY2021 LAPP Round Using Recommendations From Main Street Vision Plan

- Burlington Mills Road Realignment
- Main Street Corridor Improvements

Ideas to Reality – Large Projects

Large Projects (> \$10 million)

Larger, Regionally Significant projects (capacity improvements) are generally required to complete the full planning and project development process.

- **MTP** Large projects must be included in the MTP and conform to air quality standards.
- **TIP/STIP** Large projects must be included in the Transportation Improvement Program and the Statewide TIP (generally as an I, R or U project). Projects are typically programmed through the SPOT process.

TIP and STIP <u>must</u> match

Ideas to Reality – One Call for All

Covers All Transportation Projects / Needs Each fall the MPO will accept candidate projects for consideration

- UPWP: Planning and feasibility studies

- LAPP: Small projects (operational / safety improvements) <\$10 million</p>
- MTP/TIP: Large projects > \$10 million (*Biennially*)

THE END
