

Appendix XI: Glossary of Terms

Activity Center. Locally-serving areas of economic, entertainment, and community activity.

Allocation. An administrative distribution of funds for programs that do not have statutory distribution formulas.

Apportionment. The distribution of funds as prescribed by a statutory formula.

Appropriated Budget Authority (ABA). A form of *Budget Authority* that requires both an authorization act and an appropriations act before any funds can be obligated.

Appropriations Act. Action of a legislative body that makes funds available for expenditure with specific limitations as to amount, purpose, and duration. In most cases, it permits money previously authorized to be obligated and payments made, but for the highway program operating under contract authority, the appropriations act specifies amounts of funds that Congress will make available for the fiscal year to liquidate obligations.

Authorization Act. Basic substantive legislation that establishes or continues Federal programs or agencies and establishes an upper limit on the amount of funds for the program(s). The current authorization act for surface transportation programs is the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU).

Budget Authority. Empowerment by Congress that allows Federal agencies to incur obligations that will result in the outlay of funds. This empowerment is generally in the form of appropriations. However, for most of the highway programs, it is in the form of *contract authority*.

Budget Resolution. A concurrent resolution passed by Congress presenting the Congressional Budget for each of the succeeding 5 years. A concurrent resolution does not require the signature of the President.

Capital Area MPO. Capital Area Metropolitan Planning Organization.

Contract Authority (CA). A form of *Budget Authority* that permits obligations to be made in advance of appropriations. Most of the programs under the *Federal-Aid Highway Program* operate under Contract Authority.

Crash Reduction Factor (CRF). Estimates of the crash reduction that might be expected if a specific countermeasure or group of countermeasures is implemented with respect to intersection crashes, roadway departure and other non-intersection crashes, and pedestrian crashes. The crash reduction estimates are known as Crash Reduction Factors (CRFs). A CRF is the percentage crash reduction that might be expected after implementing a given countermeasure.

Expenditures. See *Outlays*.

Federal-aid Highway Program (FAHP). An umbrella term, not defined in law, which in general refers to most of the Federal programs providing highway funds to the States. When used in a budgetary context, FAHP specifically refers to highway programs financed by contract authority out of the Highway Account of the Highway Trust Fund (HTF), plus any HTF supplemental appropriations for the Emergency Relief Program. Such authorizations are contained in titles I and V of SAFETEA-LU and in 23 U.S.C. 125, as well as in acts providing supplemental appropriations.

Federal Highway Administration (FHWA). The Federal agency within the U.S. Department of Transportation responsible for administering the Federal-aid Highway Program.

Firewall. A budgetary device separating certain Federal spending within the discretionary spending category from other spending in the discretionary category. Spending for programs with firewalls may not be reduced in order to increase spending for other discretionary programs. The SAFETEA-LU establishes, for fiscal years 2005-2009, a firewall to protect highway and highway safety spending and a firewall to protect transit spending.

Fiscal Year (FY). The accounting period for the budget. The Federal fiscal year is from October 1 until September 30. The fiscal year is designated by the calendar year in which it ends. For example, FY 2006 runs from October 1, 2005, until September 30, 2006.

Guaranteed Funding. Highway, highway safety, and transit spending protected by *firewalls*, plus highway funds that are classified as mandatory spending, i.e., exempt from the *obligation limitation*.

Highway Trust Fund (HTF). An account established by law to hold Federal highway-user taxes that are dedicated for highway and transit related purposes. The HTF has two accounts: the Highway Account, and the Mass Transit Account.

Intelligent Transportation System (ITS). Improves transportation safety and mobility and enhances American productivity through the integration of advanced communications technologies into the transportation infrastructure and in vehicles. Intelligent transportation systems (ITS) encompass a broad range of wireless and wire line communications-based information and electronics technologies.

Locally Administered Projects Program (LAPP). The program used by the Capital Area MPO to distribute federal dollars to local governments for the implementation of transportation projects.

North Carolina Department of Transportation (NCDOT). The state agency overseeing transportation for North Carolina. In CAMPO, there are three NCDOT Divisions represented: Divisions 4, 5 and 6.

National Environmental Policy Act (NEPA). Federal law requiring agencies using federal funds to integrate environmental values into their decision making processes by considering the environmental impacts of their proposed actions and reasonable alternatives to those actions.

Obligational Authority (OA). The total amount of funds that may be obligated in a year. For the Federal-aid Highway Program this is comprised of the *obligation limitation* amount plus amounts for programs exempt from the limitation.

Obligation Ceiling. Identical to *obligation limitation*.

Obligation Limitation. A restriction, or "ceiling" on the amount of Federal assistance that may be promised (obligated) during a specified time period. This is a statutory budgetary control that does not affect the apportionment or allocation of funds. Rather, it controls the rate at which these funds may be used.

Obligation. The Federal government's legal commitment (promise) to pay or reimburse the States or other entities for the Federal share of a project's eligible costs.

Outlays. Actual cash (or electronic transfer) payments made to the States or other entities. Outlays are provided as reimbursement for the Federal share for approved highway program activities.

Penalty. An action taken by Federal agencies when the grant recipient does not comply with provisions of the law. For the highway program the imposition of penalties, which are defined in law, may prevent a State from using or receiving its full apportionment or may force a transfer from one program to another.

President's Budget. A document submitted annually (due by the first Monday in February) by the President to Congress. It sets forth the Administration's recommendations for the Federal budget for the upcoming fiscal year.

Rescission. Legislation enacted by Congress that cancels the availability of budget authority previously enacted before the authority would otherwise expire.

Revenue Aligned Budget Authority (RABA). The adjustment in funding made annually to the highway program as a result of the adjustment in the *firewall* level for highways. The firewall level is adjusted to reflect revised receipt estimates for the Highway Account of the Highway Trust Fund. Then, adjustments—equal to the firewall adjustment—are made to Federal-aid highway authorizations and obligation limitation for the fiscal year. Under SAFETEA-LU, the first adjustment is for FY 2007.

Sliding Scale. The normal Federal share of 80% for non-Interstate and 90% for Interstate is adjusted upward to no more than 95%, based on a sliding scale, for States with large amounts of Federal lands (over 5% of the total area of the State)

State. As defined in chapter 1 of Title 23 of the United States Code, any of the 50 States, comprising the United States, plus the District of Columbia and the Commonwealth of Puerto Rico. However, for some purposes (e.g., highway safety programs under 23 U.S.C. 402), the term may also include the Territories (the U.S. Virgin Islands, Guam, American Samoa, and the Northern Mariana Islands) and the Secretary of the Interior (for Indian Reservations). For the purposes of apportioning funds under sections 104, 105, 130, 144, and 206 of Title 23, United States Code, and section 1404 of SAFETEA-LU (relating to the safe routes to school program), the term

"State" is defined by section 1120(c) of the SAFETEA-LU to mean any of the 50 States and the District of Columbia.

Statewide Transportation Improvement Program (STIP). A staged, multi-year, statewide, intermodal program of transportation projects which is consistent with the statewide transportation plan and planning processes and metropolitan plans, TIPs and processes.

Surface Transportation Program. A category of federal transportation funds administered by the Federal Highway Administration and allocated to states and metropolitan areas based on a prescribed formula. This category of funds can provide up to 80% of the cost to complete transportation improvement projects.

Surface Transportation Program – Direct Allocation (STP-DA). A sub-category of federal funds authorized by the Federal Highway Administration directly to urbanized areas over 200,000 population for programming to address local priority transportation projects.

Technical Coordinating Committee (TCC). Staff-level body providing technical analysis and recommendations to the Transportation Advisory Committee.

Transportation Advisory Committee (TAC). Decision-making executive board for the Capital Area MPO, comprised of elected and appointed officials from member agencies.

Travel Demand Management. The application of strategies and policies to reduce travel demand (specifically that of single-occupancy private vehicles), or to redistribute this demand in space or in time.

Traffic Engineering Accident Analysis System (TEAAS). A system developed by NCDOT for use by traffic engineering professionals and others to perform crash analyses, review legal ordinances, and access a database containing information related to crashes, mileposting, crash codes, and other information.

Unified Planning Work Program (UPWP). A document describing transportation and related planning activities to be undertaken in a metropolitan area during a period of time, generally a single fiscal year. The UPWP is endorsed by the MPO board and some or most of the work is usually done by the MPO staff.

For additional definitions, see *A Glossary of Terms Used in the Federal Budget Process*, Government Accountability Office, September 2005. Also see Section 101 of Title 23, U.S.C.
