Bottlenecks are ranked by **Total Delay** – Base impact weighted by the difference between free-flow travel time and observed travel time multiplied by the average daily volume (AADT), adjusted by a day-of-the-week factor. This metric should be used to rank and compare the estimated total delay from all vehicles within the bottleneck.

CW = Clockwise CCW = Counterclockwise

Red #s = highest value for that metric

¹ Bottleneck on CAMPO CMP Network with top average maximum length during FY26 Q2 was I-40 West @ Aviation Pkwy/EXIT 285 (9.73 miles)

² Bottleneck on CAMPO CMP Network with top average daily duration during FY26 Q2 was Airport Blvd South @ NC-54/Chapel Hill Rd (971 minutes)

Report Legend

Incident/Event Icons

In most visualizations these icons are used to represent each type of traffic event:

Vehicle Related

-  - Car Fire
-  - Disabled Vehicle
-  - Major Accident
-  - Minor Accident

Emergency Related

-  - Hazardous Material
-  - Medical Emergency
-  - Police Activity

Congestion Sources

-  - Closure
-  - Congestion
-  - Dangerous Slowdowns
-  - Draw Bridge Opening
-  - Delay
-  - Emergency
-  - Other
-  - Incident
-  - Roadwork
-  - Signal Malfunction
-  - Water-Main Break

Weather

-  - Fire
-  - Flooding
-  - Foggy Conditions
-  - Tornado
-  - Weather
-  - Windy Conditions

Obstruction

-  - Animal Struck
-  - Debris
-  - Fallen Rocks
-  - Fallen Tree
-  - Overgrown Plants

Event Icons

-  - Special Event
-  - Sports Event

Waze Events

-  - All Waze-reported events will have this icon on the top left.

However, in certain visualizations the icons have been simplified down to a single shape and color to reduce clutter and confusion. These minimalist icons represent the following event types:

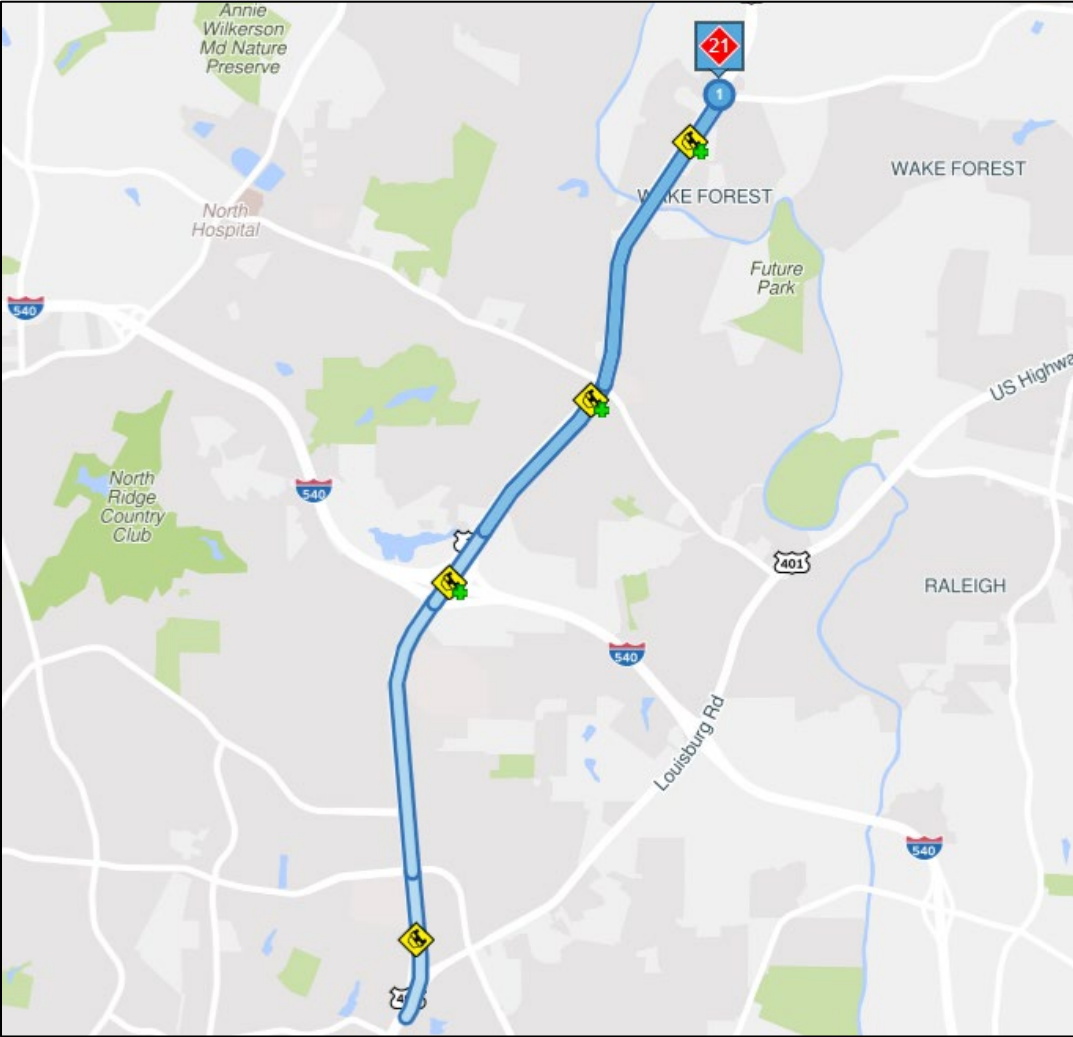

-  - Severe events and incidents (i.e. emergency roadwork, medical emergencies, and injuries)
-  - Roadwork
-  - All other events and incidents
