**Connect2050 Appendix 5. Resources on Technologies: Connected and Autonomous Vehicles, Electrification, Telepresence**

This appendix contains links to resources on emerging technological changes that are influencing patterns and modes of travel, and the environmental impacts of travel: connected and autonomous vehicles, electrification and telepresence. As MPOs and NCDOT implement the recent update of the Triangle Intelligent Transportation Systems (ITS) study, understanding the potential roles, market penetration rates and impacts of connected and autonomous vehicles will be important considerations.

Because knowledge about connected and autonomous vehicles, electrification and telepresence is evolving rapidly, this appendix highlights web sites and points of contact that can be expected to update information as it becomes available.

**Connected and Autonomous Vehicles**

Resources from the [Victoria Transport Policy Institute](https://www.caranddriver.com/features/autonomous-addressing-the-totality-of-the-driverless-car-feature)

Resources from the [Transportation Research Board](https://www.caranddriver.com/features/autonomous-addressing-the-totality-of-the-driverless-car-feature)

Resources from the [US Department of Transportation](https://www.caranddriver.com/features/autonomous-addressing-the-totality-of-the-driverless-car-feature)

**Vehicle Electrification**

Resources from the [NC Clean Energy Technology Center](https://www.caranddriver.com/features/autonomous-addressing-the-totality-of-the-driverless-car-feature)

The [Triangle Clean Cities Coalition](https://www.caranddriver.com/features/autonomous-addressing-the-totality-of-the-driverless-car-feature) maintains information on alternative fuel resources, including information on EV infrastructure programs.

**Telepresence**

Telepresence refers to connections based on virtual and remote technology that can replace in-person travel. Originally focused on tele-work, the COVID pandemic resulted in extensive adoption for other purposes, including remote meetings, remote schooling and tele-medicine.

The [Triangle Transportation Choices](https://www.caranddriver.com/features/autonomous-addressing-the-totality-of-the-driverless-car-feature), the Triangle region’s transportation demand management program developed a [toolkit for telework programs](https://www.caranddriver.com/features/autonomous-addressing-the-totality-of-the-driverless-car-feature) and can be contacted for telepresence resources.
