New Industrial Shell Building Coming Soon

Chairman Ed Garris is delighted to inform you that the Onslow County Board of Commissioners, at their October 3rd meeting, voted to award the contract for the construction of an industrial shell building in the amount of \$1,424,924 to Pro Construction, Inc. and to authorize the Chairman of the Board to execute the contract documents on behalf of the County. JOED has pledged \$250,000 towards the project from our Reserves, made possible by the JOED Investors.

The JOED Building & Sites Committee and staff will be engaged in the construction of the building. We are planning an on-site event to celebrate and showcase the extension of the road and the location of the new building, and will send the details as soon as plans are confirmed.

Please express your appreciation and support to our Commissioners for their active participation in the economic growth of Onslow County and their partnership enjoyed by JOED.
