sweat equity hours earned

719

hours of homeowner education

OUR INNOVATIONS

Home Preservation

Construction costs are rising across the industry, making it especially difficult for seniors on a fixed income to afford important repairs to their homes. Habitat's Home Preservation program allows these community members to continue to live safely in homes they already own. Repairs range from a new coat of paint to preserve the home's exterior, to a full roof replacement to correct and prevent water damage.

Crescent Magnolia

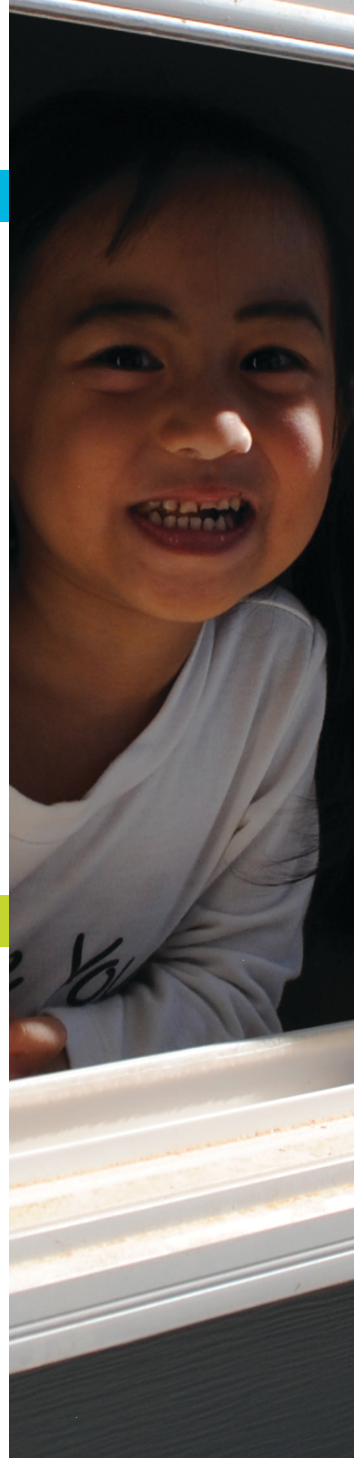

Former Executive Director Susan Levy brought to life a long-standing dream of hers, the first Habitat community in the nation designed and built specifically for seniors. Crescent Magnolia, which will be completed in 2020, will consist of 24 attached units that will allow seniors to age in place safely, independently, and comfortably.
